Light Refraction of Plasma Skies

Light Refraction of Plasma Skies

The long awaited ascension of Earth is finally at hand –*the atomic structure of Earth's atmosphere is now undergoing a quantum shift to a higher energetic state*. In many high resonance regions of the world over the last few months, sunsets and nighttime skies have become illuminated by purple, pink, orange and red plasma layers forming throughout the skies along the invisible pathways of infrasound standing waves.

Dramatic daylight plasma formations have also been observed and photographed by flabbergasted onlookers fortuitously situated in resonant infrasound focal nodes all over the planet. One of the most remarkable snapshots was captured by a resident of Wheeling, WV in late October of 2018, which presents a rainbow that has apparently been reflected multiple times by atmospheric HHO plasma sheets (above).¹

This quantum effect of resonant atmospheric refraction represents an obvious visual signal that the atomic structure of the air is now shifting back and forth as HHO plasma sheets form and dissipate high above us.

Sporadically increasing events of this kind are influenced by sharp surges in planetary infrasound resonance, known as Schumann Resonance, related to complex cosmic changes now unfolding throughout our entire solar system. Surface features of Mars have been entirely obscured during recent years due to planet-wide dust storms that have never before been witnessed by astronomers.²

As with all the planets of our Solar System, new EM field observations recently revealed Jupiter now has a 3rd magnetic pole, *as it is undergoing reversal*.³ While the other planets are also showing signs of magnetic reversal, Earth itself is also displaying new magnetic poles, one in Hawai'i and another in southern Africa.

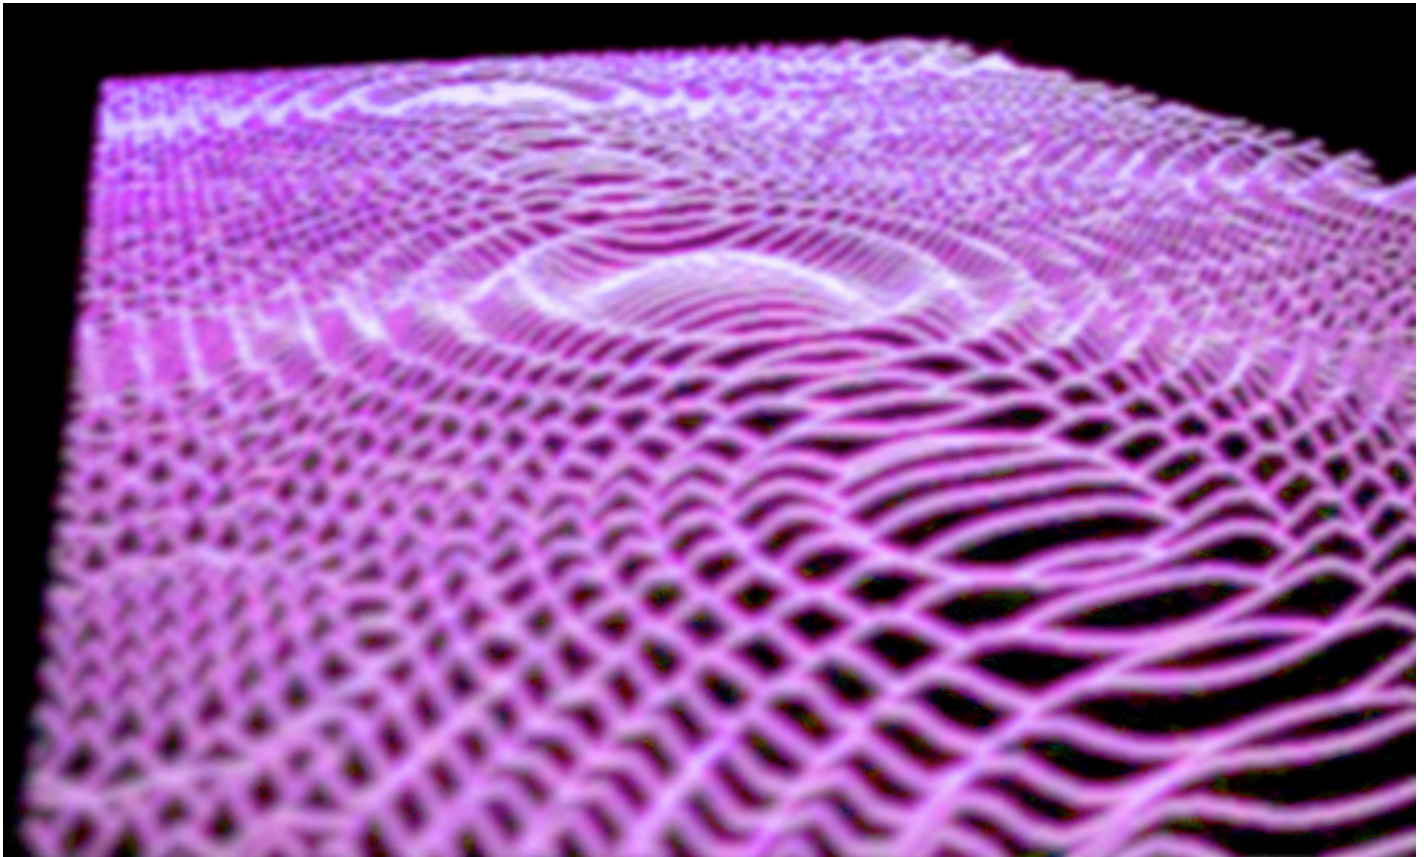

A stunning photograph taken in Oregon in late 2018 documents *atmospheric HHO plasma sheets forming concentric rings directly overhead, in broad daylight* (above).⁴ This image represents a ground-based observation of concentric HHO plasma formations induced by global infrasound standing wave resonance.

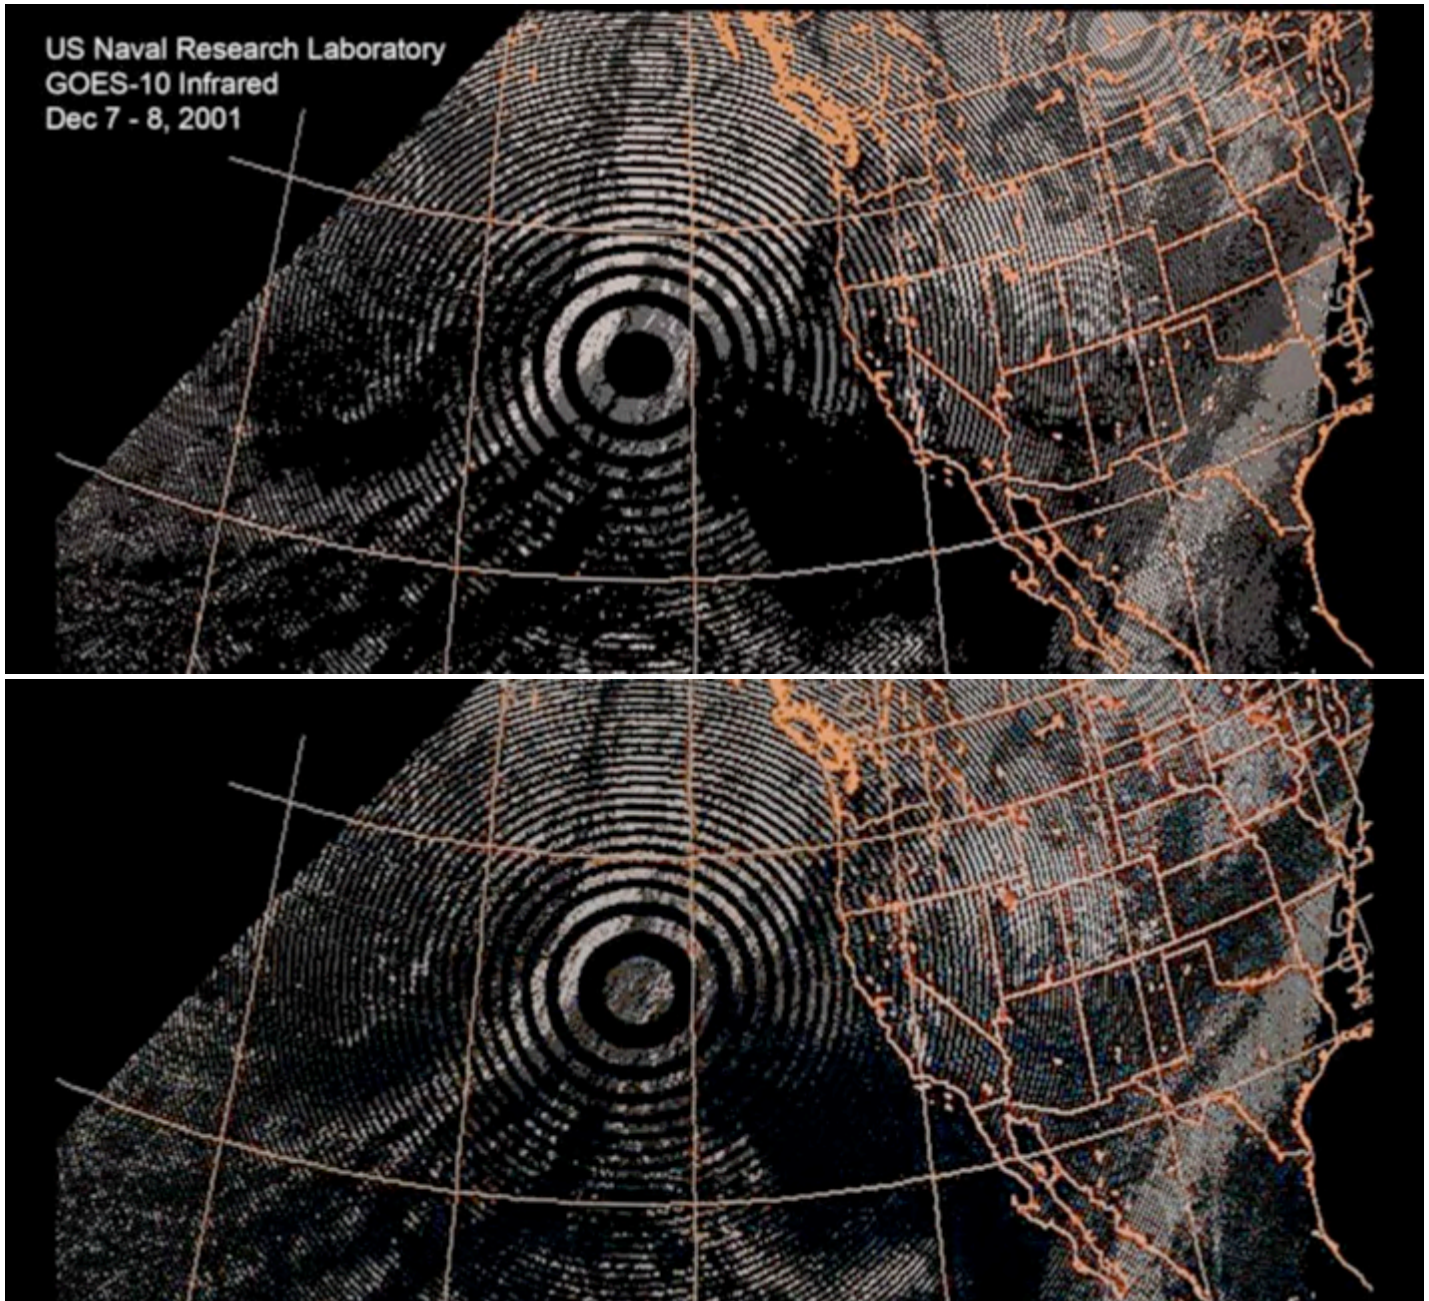

This resonant atmospheric phenomena has only been previously documented by GOES-10 satellite on December 7-8, 2001 (overleaf), and later defined by this author as an expression of the quantum function [$z_{n+1} = z_n^2$]. A decade of subsequent research identified this nonlinear distribution pattern as the global framework defining the worldwide distribution of ancient pyramids and megalithic temples, once known among ancient Sanskrit traditions as the sacred mandala of consciousness.⁵

The spectacular refractory effects of HHO plasma sheets are now recurring sporadically at times of high resonance, indicating the new atmospheric condition that will be seen throughout the skies of Earth. These special conditions will coalesce as a new quantum state of atmospheric resonance on our planet after a major event foretold by ancient indigenous cultures. Prophecy delivered through vision to Hopi Elder White Feather described total destruction of the International Space Station (ISS) as being the 9th and final sign before the coming of the Purification Day, commencing the Red Dawn of the Fifth World:

HHO plasma dome
Central Falls, Rhode Island - Apr 19, 2019

And this is the Ninth and Last Sign: You will hear of a dwelling-place in the heavens, above the Earth, that shall fall with a great crash. It will appear as a blue star. Very soon after this, the ceremonies of my people will cease.

These are the Signs that great destruction is coming. The world shall rock to and fro. The white man will battle against other people in other lands – with those who possessed the first light of wisdom. There will be many columns of smoke and fire such as White Feather has seen the white man make in the deserts not far from here. Only those which come [after the ninth and final sign] will cause disease and a great dying.

Many of my people, understanding the prophecies, shall be safe. Those who stay and live in the places of my people also shall be safe. Then there will be much to rebuild.

And soon –very soon afterward– Pahana will return. He shall bring with him the dawn of the Fifth World. He shall plant the seeds of his wisdom in their hearts. Even now the seeds are being planted. These shall smooth the way to the Emergence into the Fifth World.⁶

Another well-known prophet of the oncoming hyper-dimensional ascension is commonly called *Mother Shipton* (alias). Her prophetic writings apparently corroborate Hopi visions of the fiery descent of the ISS.

An excerpt from future prophecies offered by 'Mother Shipton' (born Ursula Sonthiel in 1488, in Norfolk, England) relates the final signs preceding the Red Dawn, using the metaphor of a fiery dragon to represent the ISS as it circles the Earth in flames for 7 days and nights, before finally impacting the planetary surface:

A fiery dragon will cross the sky
Six times before the Earth shall die.
Mankind will tremble and frightened be
For the six heralds in this prophecy.

For seven days and seven nights
Man will watch this awesome sight.
The tides will rise beyond their ken.
To bite away the shores and then
The mountains will begin to roar
And earthquakes split the plain to shore...

But slowly they are routed out
To seek diminishing water spout
And men will die of thirst before
The oceans rise to mount to the shore.
And lands will crack and rend anew
Do you think it strange? It will come true!
...

Not every soul on Earth will die,
As the dragon's tail goes sweeping by,
Not every land on earth will sink,
But these will wallow in stench and stink,
Of rotting bodies of beast and man,
Of vegetation crisped on land.

But the land that rises from the sea
Will be dry and clean and soft and free.
Of mankind's dirt and therefore be,
The source of man's new dynasty.
And those that live will ever fear
The dragon's tail for many year
But time erases memory
You think it strange? But it will be!

And before the race is built anew,
A silver serpent comes to view
And spew out men of like unknown.
To mingle with the Earth now grown
Cold from its heat and these men can
Enlighten the minds of future man.
To intermingle and show them how
To live and love and thus endow
The children with the second sight
A natural thing so that they might
Grow graceful, humble and when they do
The Golden Age will start anew.

The period of events being described by Ursula in the Shipton Prophecies is now getting underway. Her statement that "a fiery dragon will cross the sky", "for 7 days and 7 nights", "6 times before the Earth shall die" may describe destruction of the ISS as its orbit decays dramatically and burning debris slowly passes through thermospheric and mesospheric regions of the sky. The fall of the ISS would be witnessed worldwide, signaling completion of the Galactic Wave Cycle (illustrated opposite).

The final stanza from the Shipton Prophecies quoted here is also quite intriguing. "A silver serpent comes to view, and spew out men of like unknown" apparently refers to silvery-colored extraterrestrial spacecraft that land on Earth's surface *en masse* "to intermingle" and "enlighten the minds of future man."

The following statement about advanced benevolent ETs teaching Earthly humanity "how to live and love and thus endow the children with the second sight" Ursula is certainly describing renewal of resonant Ayurvedic lifestyles practiced in previous Atlantean lifetimes, endowing the adept with quantum holographic vision referred to in ancient Paleo-Sanskrit terms as *samadhi*, which taps into Akashic sensory data fields.

HHO plasma flashes
Bethel, Ohio - Jan, 2018

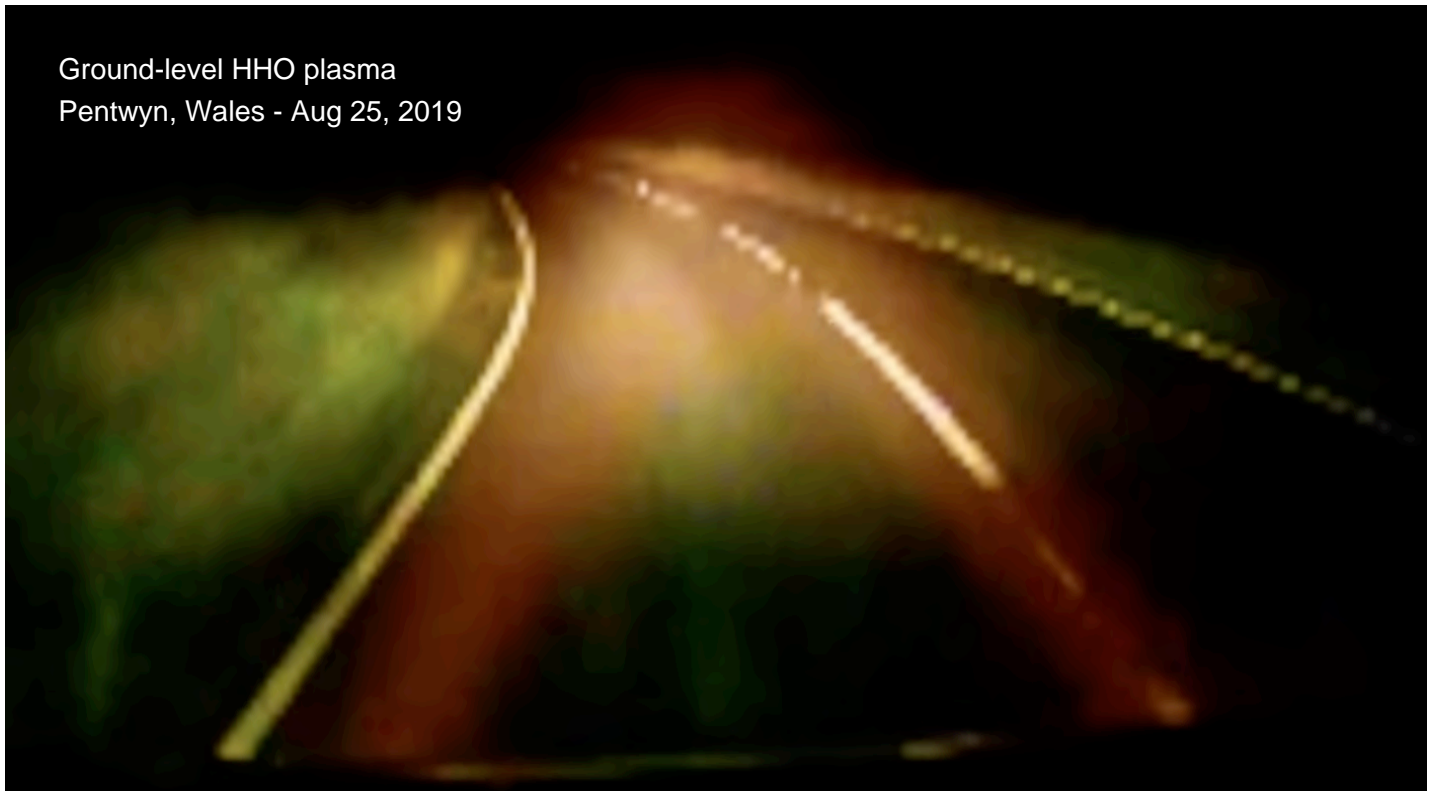

An astonishing home security camera video from Bethel, Ohio in mid-January of 2020 shows the reaction of Setting the stage for the imminent completion of the Galactic Wave Cycle have been a series of orange, red, pink and purple plasma formation events at resonant nodal points throughout the world.

One spectacular recent event of this kind was fortuitously observed by eyewitnesses and recorded on home security video footage as several very bright auroral flashes of atmospheric HHO plasma (video still above). The video captured not only the auroral flashes but also the response of the witnesses who briefly stop their tasks when they notice the unusual luminous event taking place before them.

Just as witnessed in the previously discussed daylight formations of HHO plasma sheets refracting rainbows in never-seen-before ways, identical plasma sheets have also formed along infrasound standing wave paths, converging at focal points where ancient pyramids and temples were built worldwide.

Sacred landscapes in all parts of the world, notable wherever ancient megalithic temples were once built, are experiencing a gradual, yet dramatic increase in the amplitude of received infrasound resonance.

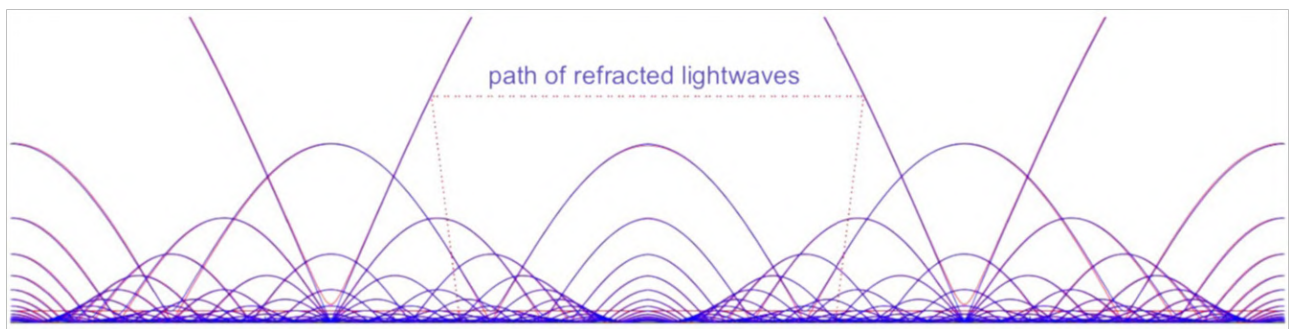

HHO plasma formations forming sporadically at nodal points in sacred landscapes of present-day England and Wales, in the UK, have surprised residents during routine events of the day and night. One spectacular example was witnessed and captured on video footage by a driver negotiating a slight curve in the road during the last hours of the night. Infrasound resonance at standing wave focal points has been consistently measured at its highest levels during these same hours from approximately 1am to 3am.

Ground-level HHO plasma
Pentwyn, Wales - Aug 25, 2019

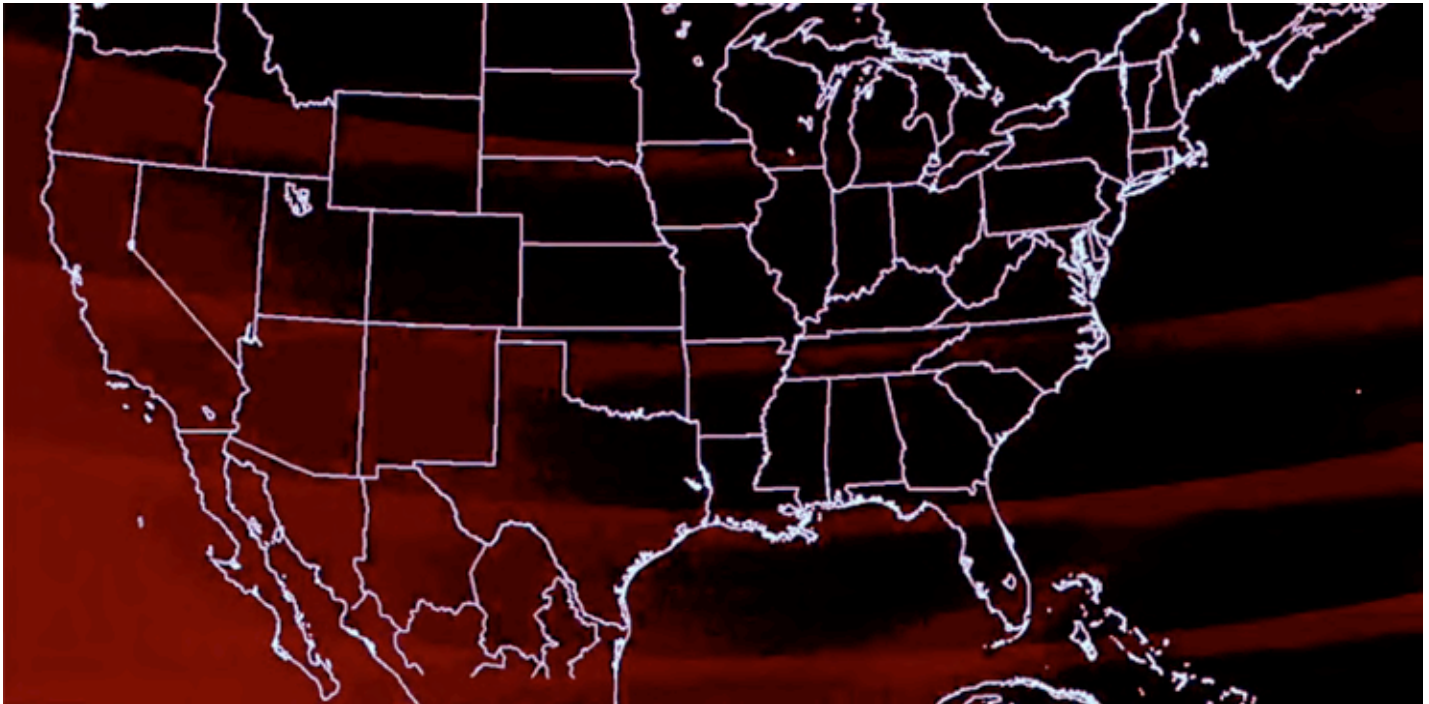

This ground-level HHO plasma formation event occurred just north of Pentwyn, Wales on August 25, 2019 (dash-cam video still above).⁷ Over-saturation of the image has enhanced the field of red HHO plasma that appears to be amplifying the light emitted from the car headlights as it moves through the formation.

This type of event has never before been directly witnessed or serendipitously recorded on video anywhere in the world, yet closely matches eyewitness Anna Yelkina's description of events that occurred in Vanavara, Siberia simultaneously with the Tunguska ground-level meteor explosion on June 30, 1908: "The whole sky was red, and not just the sky: everything around was red --the earth and the sky. Then there was a mighty thundering. A sound like a bell, like people beating a piece of iron. The thunder went on about half an hour..."⁸

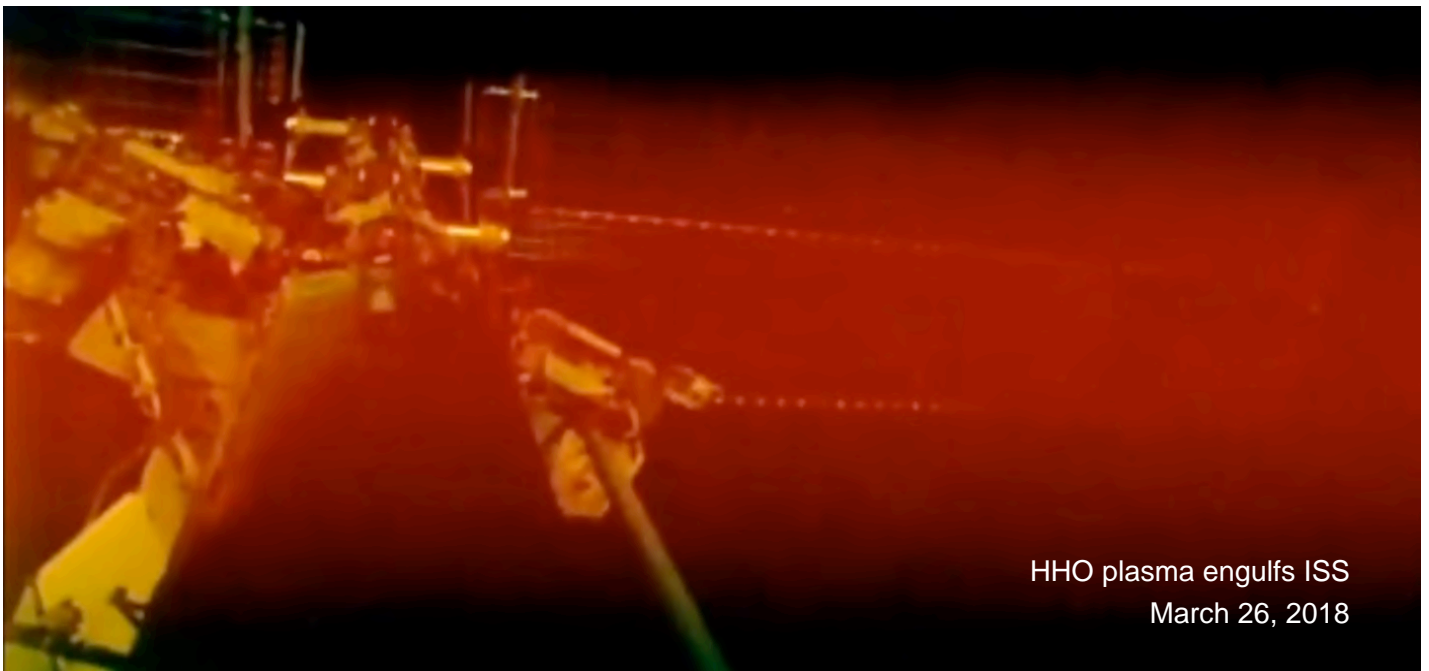

Sporadic formation of HHO plasma sheets along standing wave pathways (above) also accounts for the surprising new phenomena of commercial airplanes filled with passengers completely and instantaneously disappearing off radar monitors that began in 2011 and persists today without any reporting.⁹ The amazing videos of a 'city floating in the clouds' seen over Chinese cities of Foshan in 2015 and Yueyang in 2017.

On March 20, 2018, GOES-16 infrared satellite imagery presented hours of remarkable fluctuating HHO plasma canopy formations that have been composited by this author to show clear latitudinal bands at 24°, 30°, 36° and 43°N (below).¹⁰ Atmospheric HHO plasma was recorded by GOES-16 satellite in high-altitude formations above resonant latitudinal lines where Atlantean pyramid complexes were built.

Latitudinal alignments of ancient piezoelectric pyramids and temple sites situated throughout the world conform to this nonlinear wireless network distribution based on the quantum iterated function represented by the Sanskrit *mandala*: $[z_{n+1} = z_n^2]$, defining the global distribution of infrasound resonance nodes.

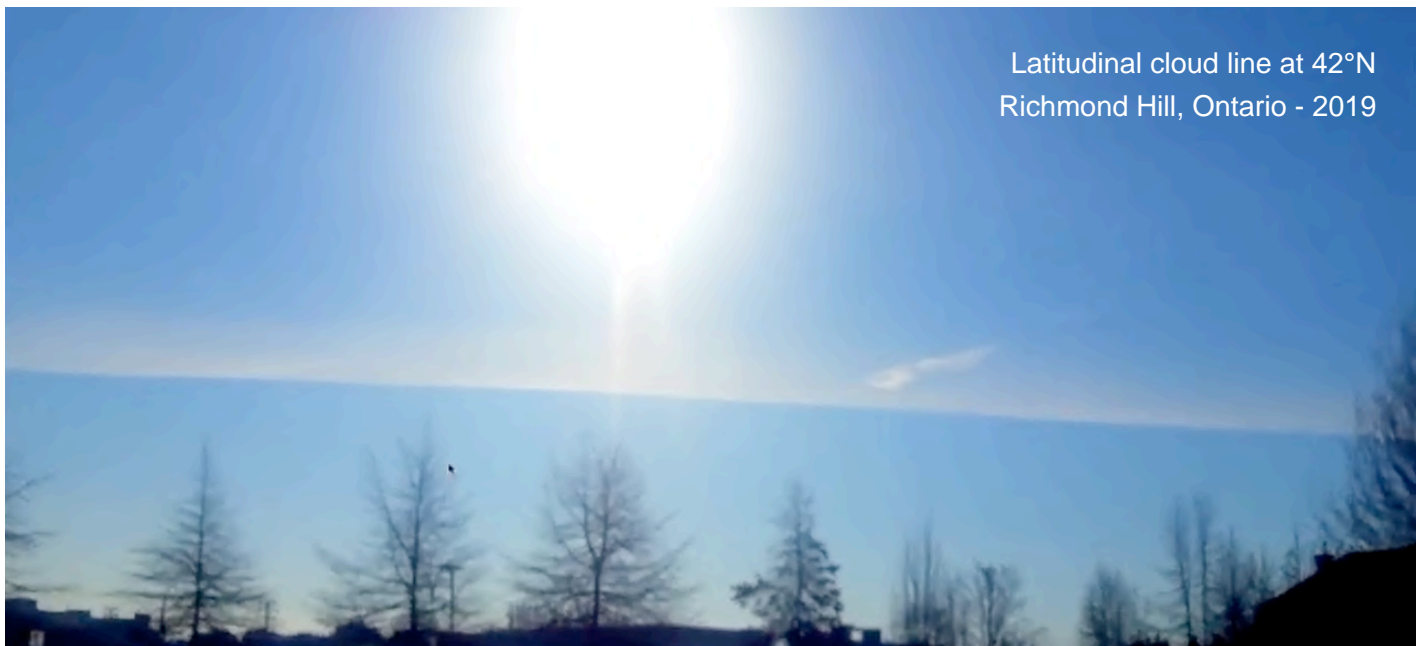

HHO plasma engulfs ISS
March 26, 2018

In another surprising event of this kind, an enveloping formation of red HHO plasma completely surrounded the ISS on March 26, 2018, and the same surprising events occurred again on 2 days later on March 28, 2018, with purple-hued HHO plasma forming a glowing haze around the entire space station (opposite).¹¹

These unprecedented events recently taking place at the ISS in near-Earth-orbit have led to Russian government disinformation concerning 'sabotage' by a small hole drilled in the hull of ISS.¹² This was actually done by government agents to create a false pretext to blame any catastrophic failures that may soon occur, crippling the ISS. The same applies to a malware virus reportedly infecting ISS systems.¹³

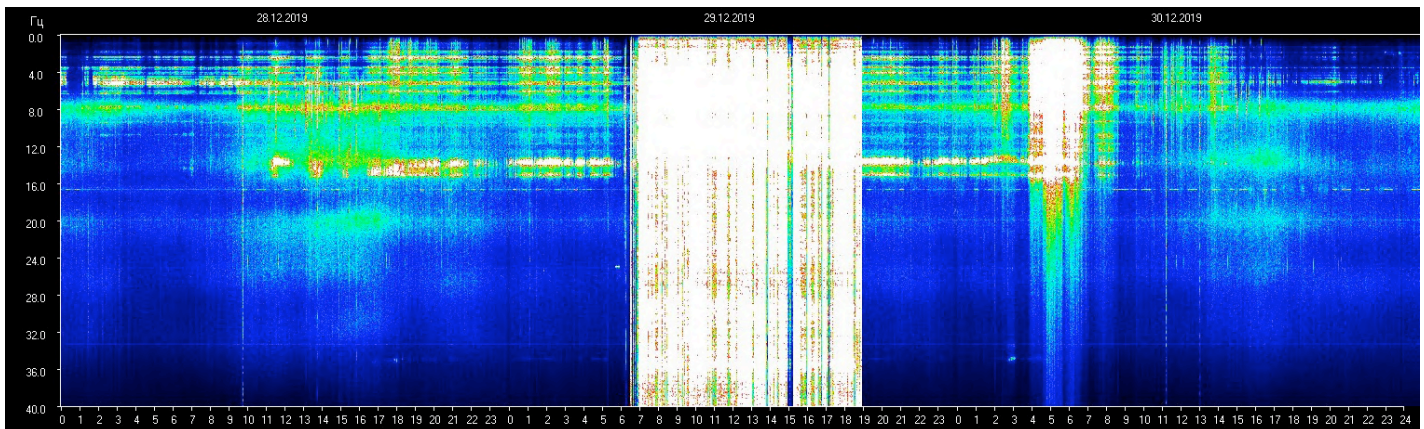

Ground-based observations of the latitudinal plasma bands seen on GOES-10 atmospheric IR data in March of 2018 have also been made all over the world as latitudinal cloud lines. This phenomenon has been increasing in frequency since it emerged over a decade ago. One of the earlier photographs that captured the cloud line phenomenon was taken in the UK on April 11, 2009 (above).

Another example of a pink latitudinal cloud line stretching from horizon to horizon was documented over Richmond Hill, Ontario in 2019, along the 42° North latitude (video still above).¹⁴ Exactly as seen in the GOES-16 satellite imagery, the northern edge is abrupt while the southern edge smoothly dissipates.

Another dramatic cloud line photograph was taken in March of 2011, from a viewpoint that allows the viewer to appreciate the immensity of this newly manifesting class of latitudinal phenomenon (above). A thorough study of latitudinal cloud band formations could be made by comparing ground-based and space-based datasets to confirm the complete series of latitudes at which this phenomenon is now appearing.

Another relevant contributing factor that should be considered is the prevalence in recent years of major spikes in planetary infrasound levels, known as Schumann Resonance. A recent example of such unusual intermittent infrasound spikes was recorded for 13 hours on December 29, 2019 (above).

While mass media continues to entirely ignore and dismiss the significance of these Schumann Resonance bursts, a growing portion of the general population on our planet is becoming aware that these events are somehow related to the Magnetic Reversal of our planet Earth, which is now reaching culmination in 2020.

In a trance reading given on January 19, 1934, Edgar Cayce indicated Magnetic Polar Reversal would begin in 1958 (Reading 3976-15), which is when Magnetic North began to deviate quickly, and in a straight line towards the Russian Arctic where it has increased its progressive speed through 2020 (diagram above):

There will be the upheavals in the Arctic and in the Antarctic that will make for the eruption of volcanoes in the torrid areas, and there will be shifting then of the poles –so that where there has been those of a frigid or the semi-tropical will become the more tropical, and moss and fern will grow. And these will begin in those periods in '58 to '98, when these will be proclaimed as the periods when His light will be seen again in the clouds. As to times, as to seasons, as to places, alone is it given to those who have named the name –and who bear the mark of those of His calling and His election in their bodies. To them it shall be given.

After having my recent epiphany on the subject of the Binary Cycle and Galactic Wave Cycle Convergence date, this special information provided through Edgar Cayce now takes on a new meaning. Through the medium Laura Knight-Jadczyk, the Cassiopaeans gave clues as to the timing of these events for general consideration –and I have applied them conclusively here to calculate at a date for arrival of the Wave.

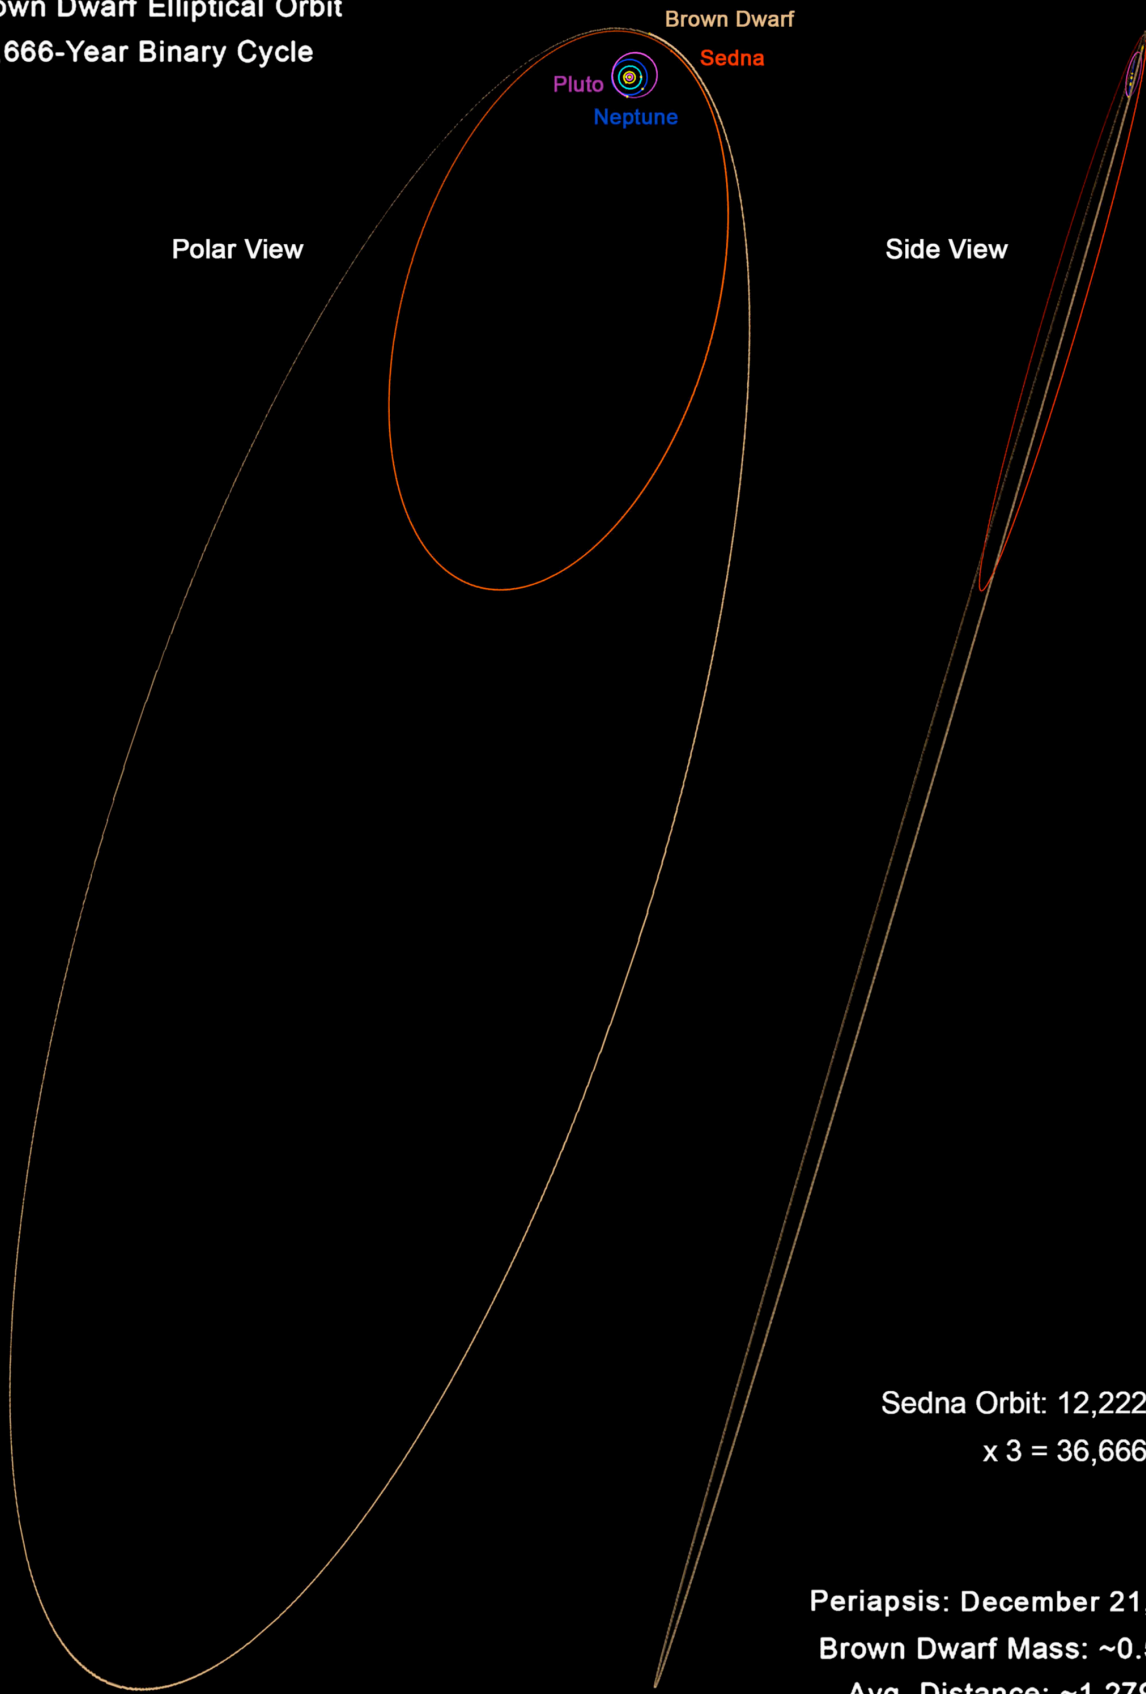

The sharp coherence of the content of these messages delivered over many years, it must be acknowledged that a singular Akashic Source has been providing information to humanity at large through the mediumship of many channels, though few have communicated with the clarity of Edgar Cayce or Knight-Laura Jadczyk. Cayce gave explanations concerning increased volcanic activity at several locations as indicators for the timing of events preceding the dramatic culmination point of the Magnetic Polar Reversal of Earth:

When there is the first breaking up of some conditions in the South Sea (that's South Pacific, to be sure), and those as apparent in the sinking or rising of that that's almost opposite same, or in the Mediterranean, and the Aetna [Etna Volcano] area, then we may know it has begun. (March 9, 1932 - Reading 311-8)

If there are the greater activities in the Vesuvius, or Pelée, then the southern coast of California –and the areas between Salt Lake and the southern portions of Nevada– may expect, within three months following same, an inundation by the earthquakes. But these, as we find, are to be more in the Southern than in the Northern Hemisphere. (January 21, 1936 - Reading 270-35)

Through these prescient statements, the Akashic Source has provided a loose framework of future events with mathematical hints that inspired a new Binary Star System model based on a 36,666.66...-year cycle:

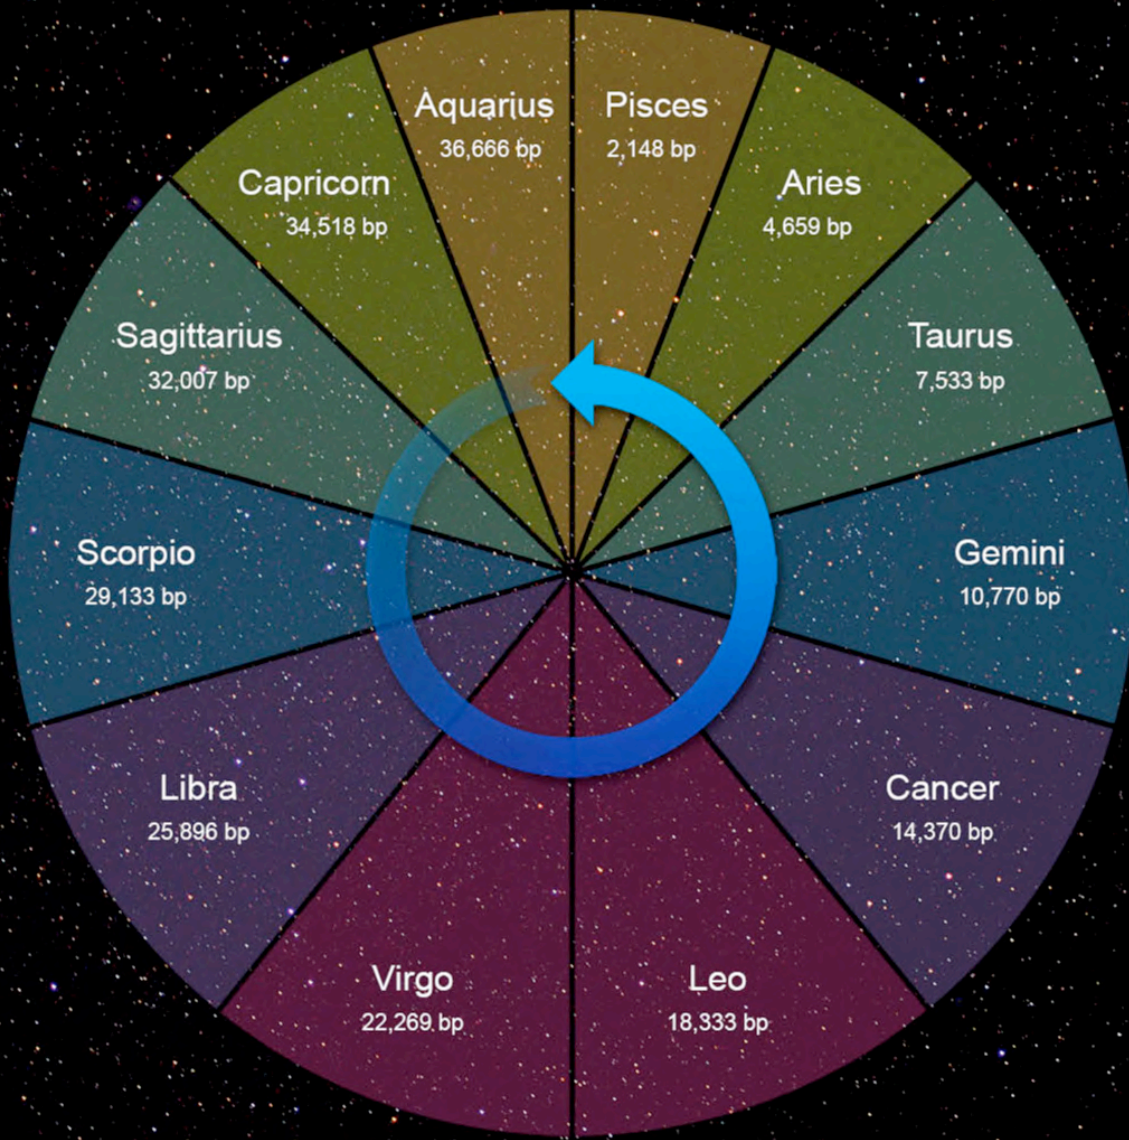

**Brown Dwarf Elliptical Orbit
36,666-Year Binary Cycle**

Sedna Orbit: 12,222 years
x 3 = 36,666 years

Periapsis: December 21, 2012
Brown Dwarf Mass: ~0.56 Sol
Avg. Distance: ~1,279.5 AU

36,666-Year Axial Precession of the Ages

For half of the 36,666-year cycle of Precession, the duration of each zodiacal Age lengthens by 363 years, while for the latter half of the cycle each successive Age diminishes by 363 years.

This periodic rate change of 363 years shows synchronicity with the known 11-year solar cycle ($11 \times 33 = 363$), reflecting one full revolution of the binary system ($11 \times 3,333.33... = 36,666.66...$).

The Binary Solar Cycle model is the only one that accurately accounts for all gravitation forces involved. Due to the repetition of 6s in the complete figure for a 36,666.66...-year Binary Solar Cycle, a repeating pattern of 3s, 6s and 9s appear in sets of figures calculated for the duration of multiple Binary Solar Cycles:

36,666.66... x 1 = 36,666.66...	36,666.66... x 5 = 183,333.33...
36,666.66... x 2 = 73,333.33...	36,666.66... x 6 = 219,999.99...
36,666.66... x 3 = 109,999.99...	36,666.66... x 7 = 256,666.66...
36,666.66... x 4 = 146,666.66...	36,666.66... x 8 = 293,333.33...

High-level information sources have tapped the Akashic field for valid information regarding the cyclical interaction of the 36,666.66...-year Binary Solar Cycle and a much longer sacred interval referred to as the *Galactic Wave Cycle* –which is said to induce a rhythmic transdimensional shift among planets such as Earth.

An interesting parallel was drawn between the Solar System and an atom in a series of Q & A dialogs with the Cassiopaeans *6th-density thought-forms (C's)* channeled by psychic medium Laura Knight-Jadczyk. In a session conducted on August 3, 1996, the C's indicated the synchronous relationship that exists between the Binary Solar Cycle and the Galactic Wave Cycle display the same temporal dynamics as biorhythms:

Q: (L) Well, you once said that the sun is a window, or transition point to another density. Are you saying that the nucleus of an atom is also a window? A: What we are saying is the sun is a proton and its twin is an electron!

Q: (L) Well, I am still trying to get at... the wave causes transitions in the macro-cosmic atom, what causes the microcosmic atom... what causes a quantum jump? What accumulates in an atom that causes it to transition? (T) Is it a case of accumulation, or something being given off?

A: Completion of Grand Cycle... And who says that the Sun's twin appears every 3600 years?

Q: (L) Okay, we have the 3,600-year comet cluster cycle, the Sun twin is another cycle altogether, and then we have the wave, which is a Grand Cycle. So, we have three things causing a transition in nature?

A: Like "biorhythms." ¹⁵

Here, the Cassiopaeans provide a subtle hint about comet cluster cycle of Oort objects that reconverge on the inner Solar System approximately every 3,600 years due to regular passes of the sun's binary companion. The 3,600-year figure given by the C's is rounded down from a *resonant period for the comet cluster cycle of 3,666.66... years that is precisely 1/10th of the Binary Solar Cycle of 36,666.66... years.*

The same subjects of the Wave, the associated Oort comet cluster and the period of its interaction with the sun's binary companion star were further addressed during a follow-up channeling session on November 2, 1994. The C's provided Laura with further details regarding the timing of events during cycle convergence:

Q: ...Where is the Wave coming from? A: Follows cluster.

Q: (L) It follows the cluster. What does this Wave consist of? A: Realm border.

Q: (L) Does the realm border wave follow the comet cluster in a permanent way? A: No.

Q: (L) Is the realm border associated with the comet cluster each time it comes? A: No. Realm border follows all-encompassing energy reality change; realm border will follow this cluster passage and has others but not most.

Q: (L) Is this realm border like a dimensional boundary? A: Yes.

Q: (L) Okay, this realm border, do dimensions... A: Pulsating realms. Fluctuating realms.

Q: (L) Is our realm fluctuating or pulsating? A: No.

Q: (L) What fluctuates? A: Residence. Your planet fluctuates between realms.

Q: (L) How often does this fluctuation occur? A: About every 309,000 years.

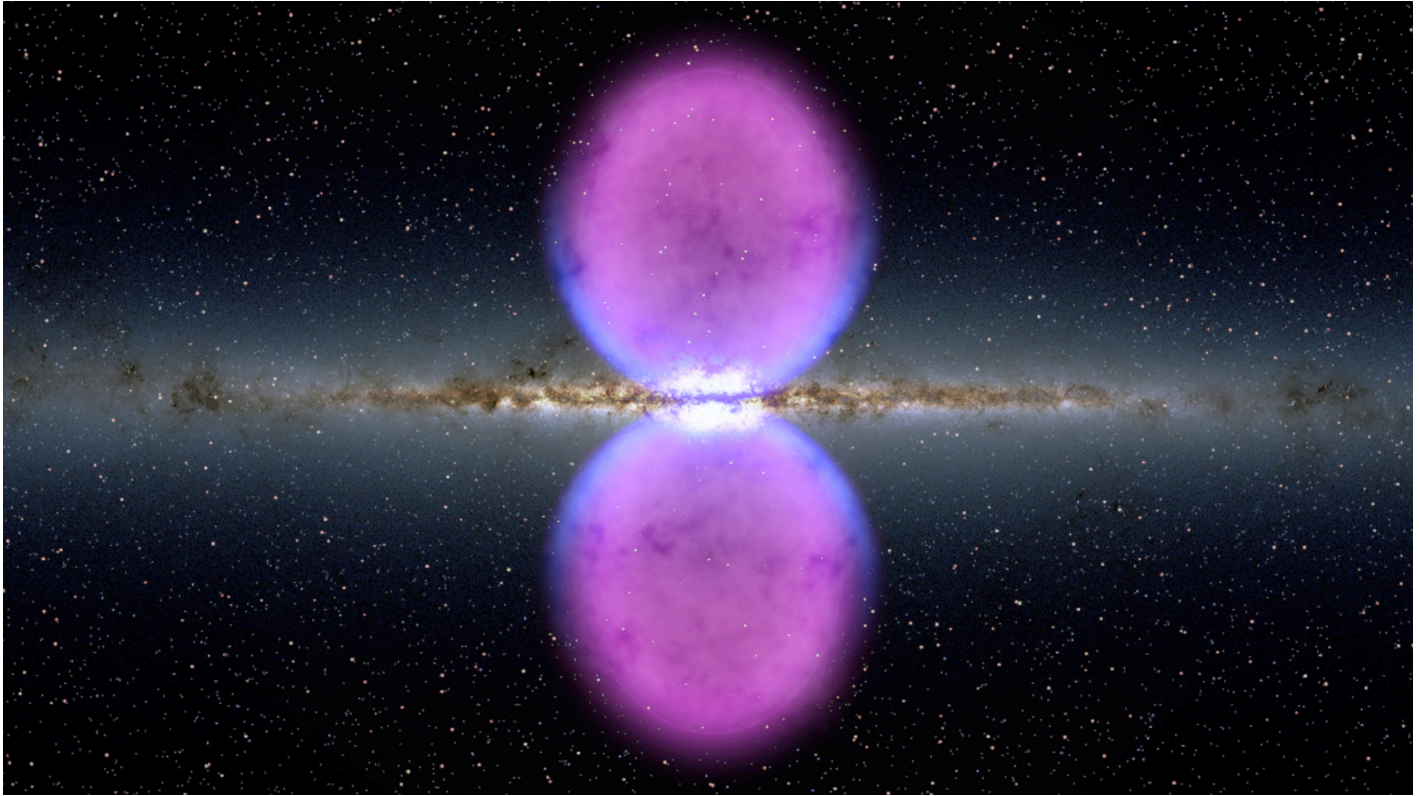

Q: (L) In other words we can expect to be in fourth density for about 300,000 years? A: Yes.

Q: (L) Does this mean that the Edenic state existed for about 300,000 years before the "Fall?" A: Yes.

Q: (L) You are saying that the planet fluctuates... A: No, realms do; planet merely occupies realm. ¹⁶

Back on October 5, 1994 the Cassiopaeans provided Laura with an approximate figure for the Galactic Wave Cycle at ~309,882 years¹⁷ that is very close to a resonant figure that synchronizes perfectly with the 36,666.66...-year Binary Solar Cycle. Further calculations of cyclical gravitational dynamics observed of our Solar System suggest that this numerical clue provided by the C's requires fine-tuning.

The C's suggested Wave Cycle of 309,882 years is quite close to Fibonacci #138 x 10⁻²³ (309,605.9...), although another figure between these two shows resonance with the aforementioned Binary Solar Cycle duration of 36,666.66... years. A slightly shorter period for the Galactic Wave Cycle synchronizes perfectly with the given Binary Solar Cycle calculations and deserves some consideration here.

This astronomical reassessment based on the information provided by the omniscient Cassiopaeans was given in the context of several prior clues given to Laura on the same subject of sacred binary numerology. Back on November 11, 1995, the Cassiopaeans had offered the following statements regarding '33.333...':

Q: (L) ...Now, the main thing I wanted to ask about is the references I come across in tons of reading, that the number 33 is somehow significant. Could you tell us the significance, in esoteric terms, or in terms of secret societies, of the number 33. There is the cipher of Roger Bacon, based on the number 33, the 33rd degree masons...

A: As usual, we do not just give you the answers, we help you to teach yourself!! Now, take 11 and contemplate...

Q: (L) Well, three times eleven is thirty-three. A: Yes, but what about 11?

Q: (L) Well, eleven is supposed to be one of the prime, or divine power numbers. In Kaballah, 11 is the power number... A: Yes...

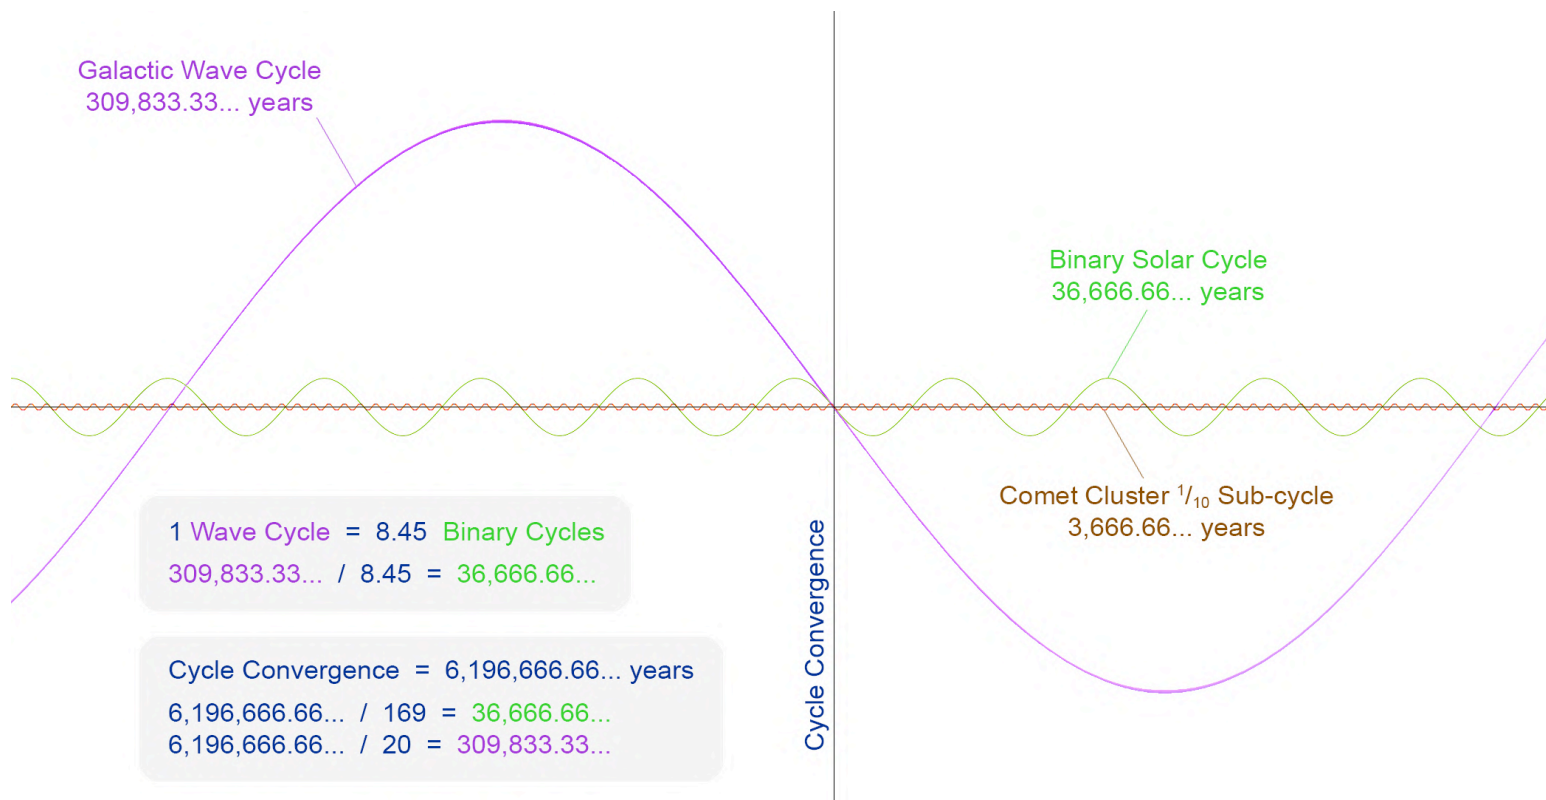

Q: (L) So 33 could represent the transformation of the physical man to the divine man through the action of secret or hidden teachings... and those who have gone through this process represent themselves with the number 33...

A: 11 squared divided by phi... 33.infinity.¹⁸

This sacred numerology Q & A session with the Cassiopaeans did not provide any specific answers, but instead encouraged Laura to further research the significance of the numbers 11 and 33, as well as phi (1.618...) and the Fibonacci sequence. The C's final statement also emphasized the repetition of digits in those two numbers by giving the value "33.infinity", which can also be written as 33.333...

This appears to be a major clue given out altruistically by the Cassiopaeans for anyone who happens to be considering Binary Cycles of 36,666.66... years. Exactly 8.45 Binary Solar Cycles elapse during each Galactic Wave Cycle of 309,833.33... years. *This must be what the C's were bringing our attention to.*

The total duration of 169 Binary Solar Cycles corresponds to exactly 20 Galactic Wave Cycles, or 6,196,666.66... years. This figure represents the frequency of cycle convergence of the Binary and Galactic rhythms, as clarified by a simple phase diagram presenting the essential relationships expressed between cycles over quite a lengthy timeframe:

The scale of these cycles is difficult to fully grasp. As the 11-year Solar Cycle elapses 3,333 times during each Binary Solar Cycle of 36,666.66... years, and 169 Binary Solar Cycles elapse during 20 Galactic Wave Cycles lasting 6,196,666.66... years, a total of 563,277 Solar Cycles elapse during each block of 20 Galactic Wave Cycles lasting 6,196,666.66... years ($3,333 \times 169 = 563,277$).

Accordingly, as the Length-Of-Day (LOD) Cycle of 5.923076... years elapses 6,190 times during each Binary Solar Cycle of 36,666.66... years, and 169 Binary Solar Cycles elapse during 20 Galactic Wave Cycles lasting 6,196,666.66... years, a total of 1,046,110 LOD Cycles elapse during each 6,196,666.66...-year period ($6,190 \times 169 = 1,046,110$).

These cycles all converged together on December 22, 2012, as marked by the Mayan long-count Bak'tun Calendar. This cycle convergence constitutes solid evidence of the 'biorhythmic' nature of vitalizing pulsations of our Binary System, as described by the C's many years ago.

Synchronous astronomical relationships demonstrated between the 11-year Solar Cycle, the 36,666.66...-year Binary Solar Cycle, the 5.923076...-year LOD Cycle, the 309,833.33...-year Galactic Wave Cycle and the 6,196,999.99...-year block of 20 Galactic Wave Cycles must be incorporated into any viable model of our Solar System. The rate change in the relative duration of each of the Precessional Ages must also be defined by reasonable parameters.

No astronomer has ever presented a model of our Solar System that can account for the widely observable gravitational forces. *The 36,666.66...-year Binary Solar System model will become widely accepted as the most accurate model of our Solar System if it can accurately predict the date of the arrival of the Wave.*

The Cassiopaeans provided another thought-provoking series of statements regarding the approaching date of the arrival of the Galactic Wave during an interesting dialog that took place on August 25, 2006:

Q: Hello? A: Over the rainbow.

Q: Who do we have with us this evening? A: Ronnjia

Q: And where do you transmit through? A: Cassiopaea/Leo.

Q: What does "Over the rainbow" refer to? A: End of the world/4th density.

Q: (Perceval) Does that mean the end of the world is nigh? A: Somewhere! ...

Q: (Guest:SD) Is there a time by which I should definitely be in France? A: April drop dead date.

Q: (Galahad) "Drop dead date". God! (Perceval) That's a loaded answer. (Galahad) Does "drop dead" apply to Guest:SD or is this more general? A: General.

Q: (Mr. Scott) Oh, great! (Alana) What does it mean "Drop dead date"? (Perceval) What does it sound like? A date that somebody or something drops dead. A: Wait and see.

Actually, the definition of the term '*drop dead date*' is quite specific. A 'drop dead date' is a provision in a contract that sets out a finite deadline which, if not met, will automatically trigger adverse consequences. *The drop dead date is the last possible date on which something must be completed.*

Taken in the context of the arrival of visible effects of the supernova blastwave of Betelgeuse coinciding with the Galactic Wave, the C's have implicated arrival of the Wave in the month of April *—but in what year?*

Progressive information released by the Cassiopaeans over many years has inspired various interpretations of possible future events. The likelihood of catastrophic future events occurring during the month of April was later revalidated on April 1, 2007 during another related line of questioning on 'Fool's Day':

Q: (L) Hello! Is anybody there? A: Hello, from Cassiopaea

Q: And who do we have with us this evening? A: Opolinia...

Q: (J) Is the April drop dead date still on the cards? A: Oh yes.

Q: (J) Is this a combination of things that are scheduled to happen in April or just one initial event?

A: That would be telling. No dice.

The Cassiopaea thought-forms are apparently willing to drop a big clue here, but are not going to reveal the arrival date of the Galactic Wave themselves, as this would violate our learning process. Well, perhaps we now have all the pieces of the puzzle concerning the crucial timing of these Earth-shifting future events?

The cyclical, biorhythmic patterns of the Galactic Wave Convergence has left an indelible imprint in the relative motions of the planets of our solar system that can be understood as a series of gravitational alignments that can be simulated by supercomputer simulations to determine the accuracy of the 36,666-year Binary Cycle model, thereby defining the exact period of offset between periapsis and the Wave.

The series of clues given by the Cassiopaeans over the many years of their dialogues with Laura Knight-Jadczyk appear to support the notion that the Wave will arrive on Earth in the month of April rather than the month of August. In addition, the '33.infinity' hint can be understood as a sly correction of the duration the C's originally proposed for the Wave Cycle at 309,882 years, giving us instead 309,833.33... years.

The statement offered by the C's concerning the periodic interaction of the Binary Cycle with the Galactic Wave Cycle indicated that Realm Border Wave follows the close passage of the Binary Companion and its associated Oort comet cluster: "realm border will follow this cluster passage and has others but not most."

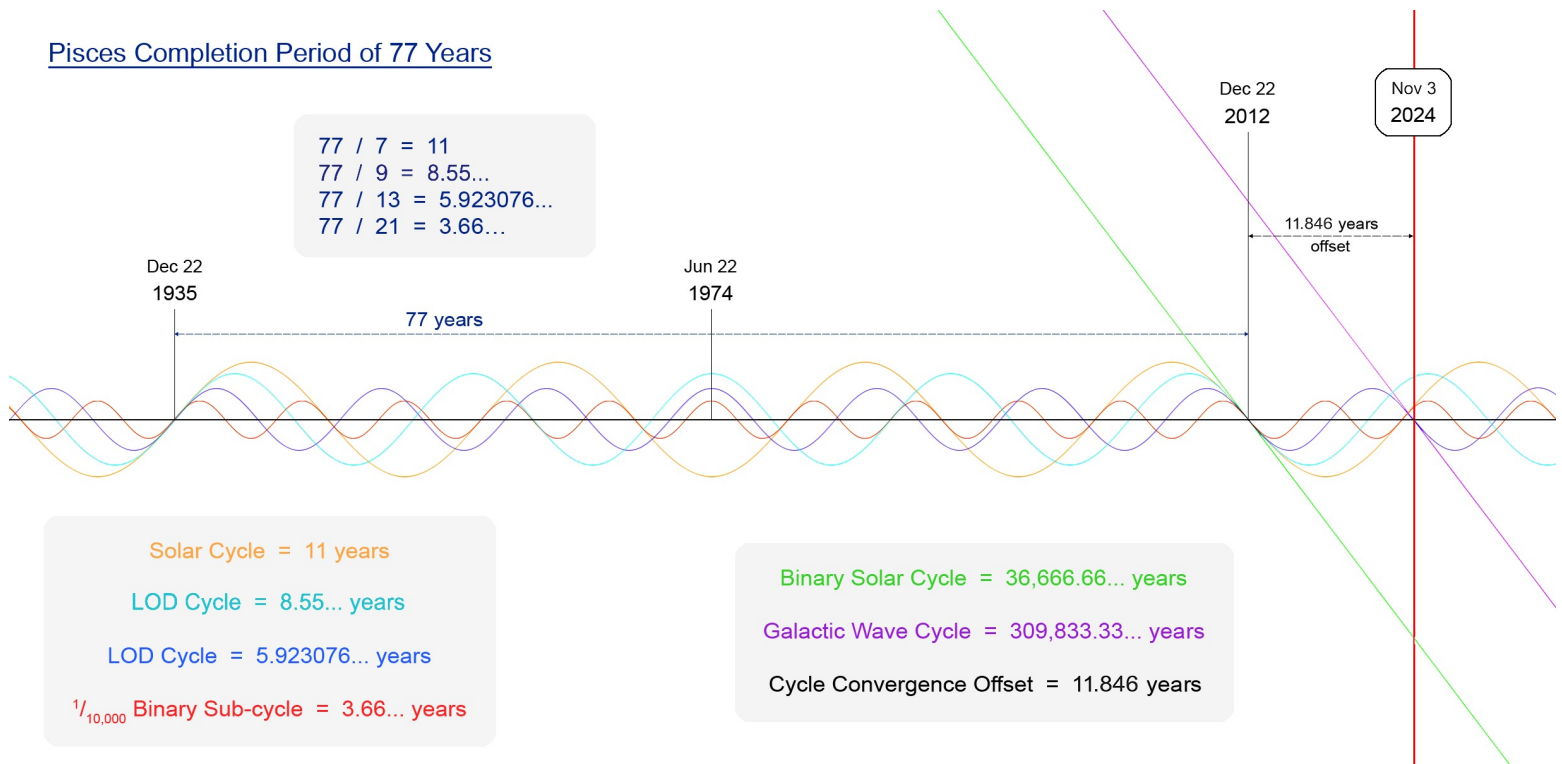

In this unusual case, the term "follow" is a fairly vague reference, and leaves us asking for more --to know exactly when to expect this following event of such great import? Over 8 years has elapsed since the point of periapsis of the Binary System, marking the closest pass of the invisible Brown Dwarf companion star.

The C's had previously explained that passage of the Wave represents a 'realm border crossing' point that will impact earth and bring it to a higher level of planetary resonance, along with a corresponding higher level of human consciousness and longevity. Indications from the temporal rhythms of the Binary Solar System model implicate the significance of a 77-year period preceding the Wave strike.

As indicated by observable timecycle dynamics outlined in the present Binary model, this 77-year period represents the definitive termination phase of the Precessional Age of Pisces during which time the three primary rhythms of the Solar System synchronize and disperse themselves before Grand Cycle closure.

Pisces Completion Period of 77 Years

$$\begin{aligned} 77 / 7 &= 11 \\ 77 / 9 &= 8.55\dots \\ 77 / 13 &= 5.923076\dots \\ 77 / 21 &= 3.66\dots \end{aligned}$$

Solar Cycle = 11 years

LOD Cycle = 8.55... years

LOD Cycle = 5.923076... years

$\frac{1}{10,000}$ Binary Sub-cycle = 3.66... years

Binary Solar Cycle = 36,666.66... years

Galactic Wave Cycle = 309,833.33... years

Cycle Convergence Offset = 11.846 years

A phase diagram presents the nonlinear interaction of 3 important cycles of our Solar System: the Solar Cycle of 11 years, the Length-Of-Day (LOD) Cycle of 5.923076... years and the $\frac{1}{10,000}$ Binary Sub-cycle of 3.66... years (above). The bracketed period of 77 years extending from the December Solstice of 1935 to the December Solstice of 2012 represents the final phase of the Precessional Age of Pisces, completed at periapsis of the Binary System (green line marking the closest pass of the Brown Dwarf companion star).

The subject of the terminal phase of the Age of Pisces and the significance of the year 1936 in our transition to the "Golden Age" of Aquarius was directly addressed and clarified during a dialog between 'Billy' Meier and his extraterrestrial teacher Semjase during Meier's 9th Contact, which took place on March 21, 1975:

Semjase: Further necessary knowledge regards a cosmic change... of the "Age of Aquarius", also called the "Golden Age". In this respect I must first explain the religious interpretations concerning this epoch are wrong... By no means is this new age a final time, because in truth it brings real life. This epoch enables everything to develop to highest potential, including spirit, according to providence. But it will take many centuries after entering this period to reach such advanced levels...

This is the initial phase of the "Golden Age", the transition phase of 184 years. The culmination of this period will come in 2028 (our years). The revolutionary force of this new epoch has begun in 1844, and since then the extensive alterations on Earth rush irresistibly forward...

The first half of the transition period lasted 92 years, until 1936, while the Earth felt the last of the "Age of Pisces" (as it is called). Since that time, rapidly evolving events, discoveries, inventions, etc., were characteristic as for no other time. This whole sun system with all its innumerable creatures is under the control of the new age. Each and everything is influenced by it, because this is a cosmic law...

The origin of this epochal change is the radiation of the huge central sun around which your system circles... and passes through 12 epochs within the meaning of your astrologer's zodiacs. The Earth has already touched the outer borders of the "Golden Radiation" of the central sun, which are of the strongest and most revolutionary radiation...

The way-showers of these changes are in cosmic destiny and appear under the Creation laws. The way-preparers for these revolutions (affecting humans) are also human beings who, as prophets and teachers, announce the truths of knowledge and spiritual wisdom. These way-preparers will be considered revolutionaries, heretics, and exiles, for they will announce the truths for all to see.¹⁹

According to this Binary Solar System model based on special pertinent information provided from the Akashic Source through multiple channels, the cosmic date of November 3, 2024 marks the termination of a 309,833.33...-year Galactic Wave Cycle. Arriving 11.846 years after periapsis of our Binary Solar System at the December Solstice of 2012, the cycling Galactic Wave will inundate Earth simultaneously with the blastwave of the Betelgeuse supernova event. *These stupendous events are now close at hand.*

Supporting the imminence of these events are clear statements from the Cassiopaeans on what to expect. On March 23, 2019, the C's informed us of coming changes: "Be aware that a new world will dawn! Be not oppressed by the death throes of the old world."²¹ More encouraging words were shared during the close of another recent channeling session by Laura and her group conducted on December 28, 2019:

Soon things in your realm will become very chaotic and strange. It will give chills to many. Be not alarmed! It will pass and there will be a new reality to explore. Cosmic forces will be displayed and there will be many searching for answers. Be prepared to give the help that is needed. Be together in love and peace...²⁰

All deuterium atoms in the atmosphere of planet Earth will be resonantly transmuted into protium by the Galactic Wave, resulting in atomic purification of all hydrogen atoms on Earth –in the oceans, lakes, and rivers; and in the sky. *Ancient American and Australian traditional prophecies concerning 'rainbow people' describe purified human beings who are genetically restored under the refracted light of twin suns.*
