Human-Resonance.org

Ancient parables tell us to “*make a temple of the body*”, for “*cleanliness is next to godliness*”. Ancient Siddha texts describe processes for the attainment of psycho-spiritual Siddhi superpowers that include optical invisibility, levitation, Astral travel (remote viewing), bi-location, multiplication, invulnerability to attack, immunity to poisons and other innate, parapsychical quantum capabilities of the human body.

The same Siddha texts are written in coded language that elucidates the sacred trinity of essential elements, enabling the attainment of quantum capacities, is comprised of *radium, mercury and sulfur* —taken as nanopowders by all initiated Siddha practitioners throughout the known world, and beyond.

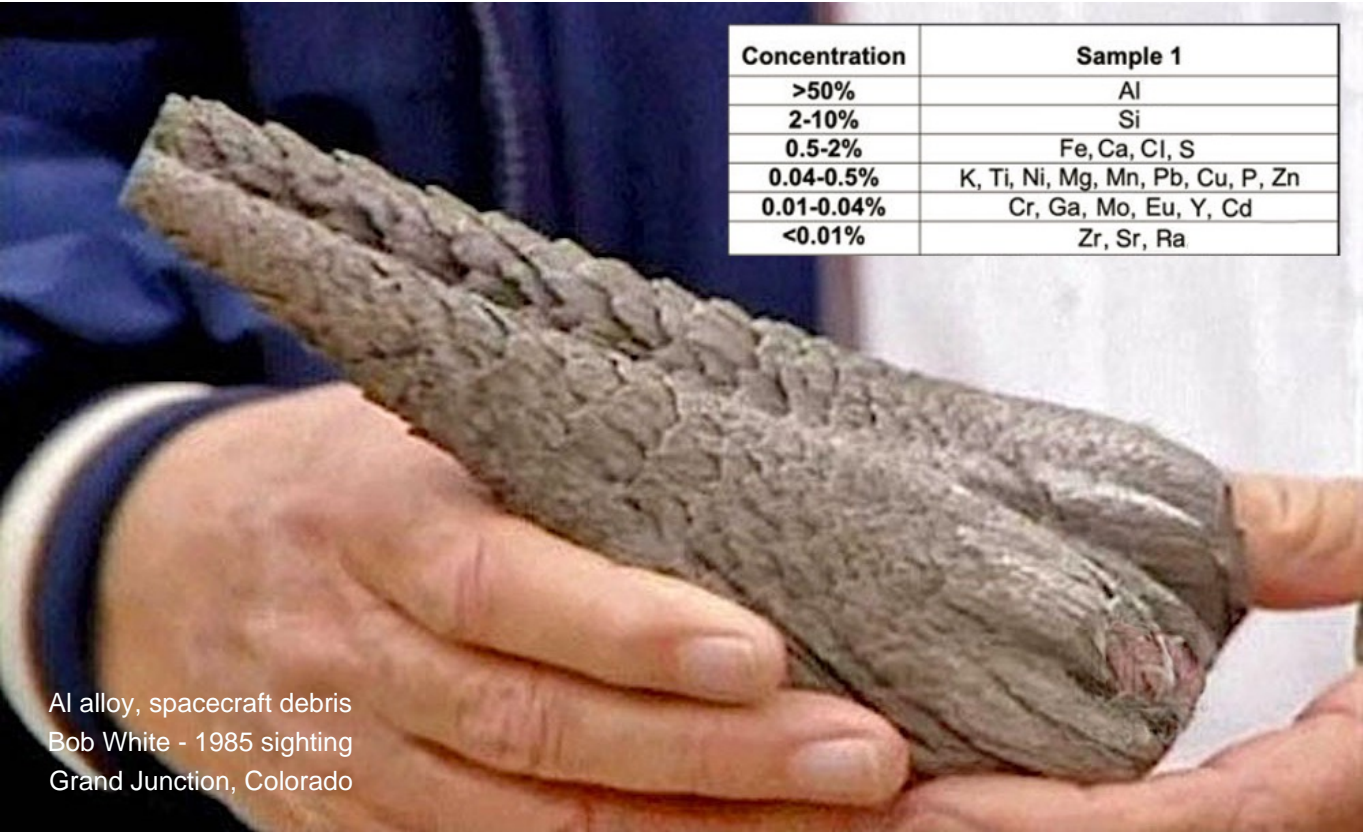

Ancient Hindu *rasayana* medicine applies formulations that include a great variety of metal oxides and sulfides for effectively doping the human body with the same compounds present in ancient geopolymer temple stones and cements; the same compounds found in trace amounts in spacecraft alloys from various cases. Geopolymer samples from the Great Pyramid emulate the compositions of UFO alloys.

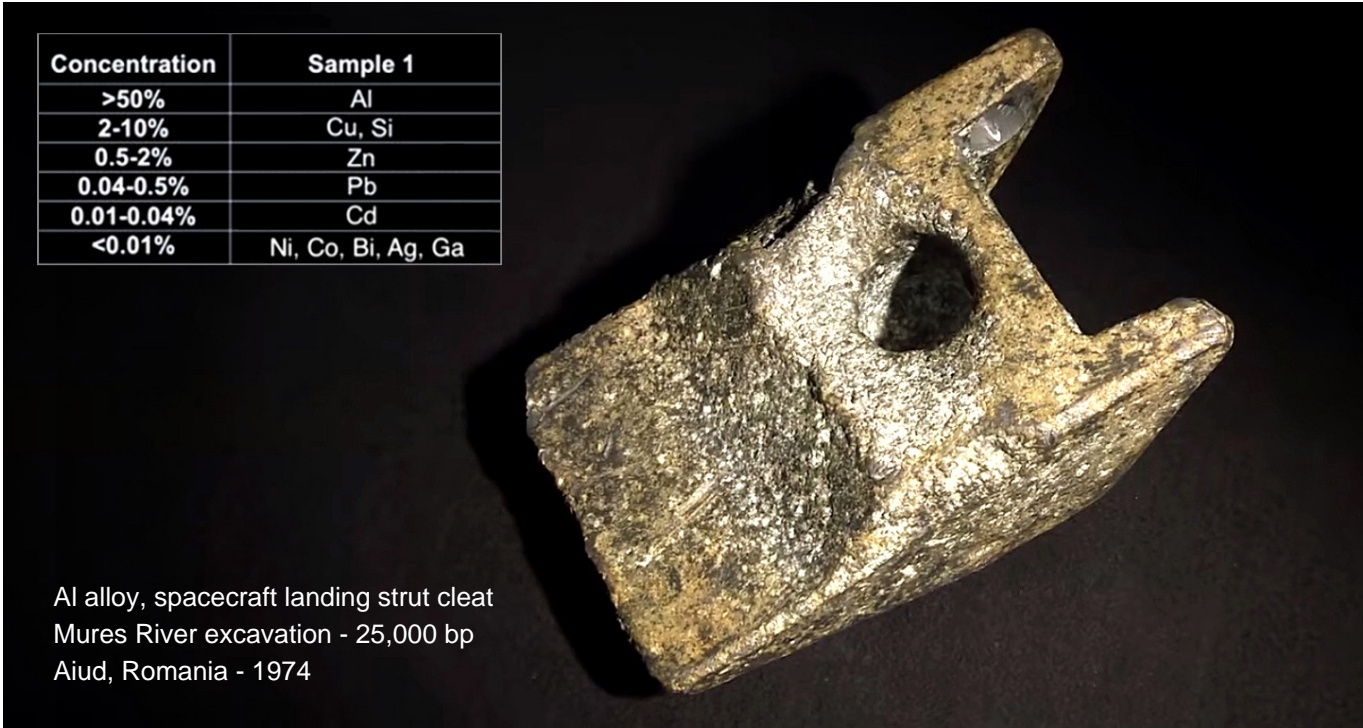

The significantly elevated  $\gamma$ -ray flux maintained by the radioactive alloys of spacecraft hulls generates matter-antimatter particle ensembles in the form of neutrino Fermionic condensate (NFC); by conversion of  $\gamma$ -photons into neutrino-antineutrino pairs, triplets or quadruplets. The doping of spacecraft alloys with low concentrations of a wide range of transition metal dichalcogenides (TMDs) and rare-earth elements (<0.001%) imbues the alloy with exotic properties of an exciton-polariton unconventional superconductor, belonging to a special class of metamaterials that includes quantum applications to the human body.

Ancient Siddha adepts of India and Atlantis applied this combination of elemental nanocompounds for doping the human body itself, thereby generating fine distortions of the spacetime field around the body that can become visible as photon bursts near major arterial pathways. This complex blend of rare-earth elements enabled the pristine preservation the living blood of Christ, excavated near the cross-hole and on the Ark of the Covenant until excavation by Ron Wyatt near the Garden Tomb on January 6, 1982.

Analysis of spacecraft alloys found by Jose Padilla, Bob White and near Aiud, Romania all conform to a pressure- and photon-induced class of exciton-polariton superconductor, employed by highly advanced space-faring civilizations throughout the Universe. In all cases, unconventional superconductors are used in conjunction with doping the bodies of the crew with ingested nanopowder blends that include a great variety of rare-earth compounds activated by radium sulfide. This complex process effectively transforms the body into a liquid crystal superconductor for facilitating transdimensional hyperspace travel.

Luminous orbs, 2010  
La Maná, Ecuador

A decade of research into the Sotomayor collection of Ohum artifacts from La Maná, Ecuador revealed the large group of psychoacoustic whistles was played by Ohum priests in conjunction with the drinking of neutrinic elixirs. These elixirs incorporated radioactive elements that were also applied as paint to the walls of pyramid chambers. Sacred items composed of radiant Au-Cu-Ra alloys were used to generate *downshift emission fluorescence in the multi-colored mineral inlays of the artifacts* (overleaf). The glow indicated the intensity of invisible  $\gamma$ -rays; activating elixirs for DNA enhancement by illumination within.

*"Soma is food for the gods." ~ Chandogya Upanishad*

*"We have drunk the Soma and become immortal. We have attained the light the gods discovered...  
One thinks to have drunk Soma... Of him... no one ever tastes." ~ Rig Veda*

*"The man who supplies food hath always [his Soma] pressing stones adjusted, a wet Soma filter...  
he who hath this knowledge wins the luminous spheres." ~ Atharva Veda*

Replicating ancient Ohum and Siddha recipes, the Akasha bhasma formulation has been developed for *Akasha Biophotonics* skin gel, conferring potent therapeutic as well as psychic benefits. Akasha bhasma is suspended in carbomer 940 (a polyacrylate polymer base), and pH balanced with a 10% NaOH solution.

*Akasha Biophotonics* gel (23 fl. oz.)

**Usage:** For full-body applications to the skin 3-4 times per week (after bathing), carefully avoiding contact with the eyes, nose, mouth and all sensitive areas.

**Storage:** Keep in a cool, dry place, out of the reach of small children or house pets.

**Ingredients:** purified water, carbomer 940, sodium hydroxide, shilajit (potassium, calcium, magnesium), bismuth, europium oxide, neodymium oxide, gadolinium oxide, samarium oxide, tellurium oxide, cerium oxide, lanthanum oxide, terbium oxide, mercury sulfide, antimony sulfide, silver sulfide, nickel oxide, ruthenium oxide, copper oxide, iron oxide (magnetite), zinc oxide, selenium, lutetium oxide, cobalt oxide, molybdenum disulfide, tin oxide, yttrium oxide (europium-doped), lead sulfide, vanadium oxide, arsenic trisulfide, tourmaline, lithium, azadirachta indica, aloe vera, piper betel, hibiscus sabdariffa, aspalthus linearis, medicago sativa, vitis vinifera, centella asiatica, citrus x paradisi, couroupita guianensis, citrus medica v. sarcodactylis, calendula officinalis, gold, sulfur and oxalic acid.

Natural Ayurvedic reducing agents yield biogenic nanoparticles 2-120 nm in size, as applied in psychoacoustic temples of the Atlantean Paleo-Sanskrit civilization. The most beneficial effects of *Akasha Biophotonics* gel are achieved when used in combination with *Akasha Biophotonics* bhasma (encapsulated with ashwagandha).

*Akasha Biophotonics capsules & gel*  
*Neutrinic elixir products*

*Akasha formulation*  
*Ashwagandha base*

When applied properly according to given dosages over a period of several weeks, *Akasha Biophotonics* products confer benefits through 9 distinct modes of activity\*:

- 1) Disinfects via anti-bacterial, anti-fungal, anti-protozoal and anti-tumor activities of nanoparticles, and full-range UV photon emission within the cells of the body.
- 2) Disinfects via anti-bacterial, anti-fungal and anti-tumor effects of herbal extracts used as capping agents with additional anti-oxidative, anti-inflammatory effects.
- 3) Increases  $H_2$  levels in blood for anti-oxidative and anti-inflammatory effects via rare-earths releasing hydrogen atoms during formation of hydroxide compounds.
- 4) Increases the flow rate of the qi meridian system throughout the entire body by UV-A photon emission; increasing the stem cell production rates of corpuscles.
- 5) Enhances cellular metabolism via IR & red photon stimulation of mitochondria, increasing energy levels and lowering recuperation time after strenuous activity.
- 6) Enhances lifespan longevity, cellular regeneration and reproductive fertility via ionizing radiation and NiO binding, promoting HR DNA damage repair process.
- 7) Enhances DNA accessibility, genetic expression, memory formation and recall by remodeling the 3D genomic architecture of chromatin within the cell nucleus.
- 8) Enhances Akashic (psychic) access of the endocrine system by electron-positron, neutrino-antineutrino pair production; generating neutrino Fermionic condensate.
- 9) Enhances the body's dielectric & magnetic properties via spin-phonon coupling, forming magnon Bose-Einstein condensate under  $\gamma$ -radiation in strong EM fields.

\*Conclusions are based on new findings that have not been evaluated by the FDA.

*Akasha Biophotonics* products are available for online purchase from the inventor Alexander Putney at [www.human-resonance.org](http://www.human-resonance.org); promoting memory enhancement, inner communication with the Higher Self, and expansion of psychic awareness. These benefits magnify potent cosmic influences of the Betelgeuse Supernova, with surges in  $\gamma$ -radiation and neutrino flux density now driving the Ascension of planet Earth. As diuretics, these products increase the body's liquid metabolism, and require regular supplemental hydration of the body. Moisturizing skincare products should also be used to counter dehydration effects.

Take 1 capsule daily with water and a meal. Drink 7-8 glasses of pure water daily to counterbalance dehydration by diuretic effects of *Akasha Biophotonics* products.  
Warning: *Insufficient hydration causes headache, dizziness, cramps or constipation.*  
For use by adults only. Should not be used by pregnant or breastfeeding women.  
Made for use in combination with regular applications of *Akasha Biophotonics* gel.

Enhanced by various medicinal capping agents, this special therapeutic blend of rare-earths and metallic nanocompounds generates photons at multiple healing frequencies within the infrared to ultraviolet range:

Element	Compound	Reducing agent	Size (nm)	PL peaks (nm)	Color(s)
Bismuth	Bi	<i>Azadirachta indica</i>	4-20	583, 758, 1188	
Lead	PbS	<i>Aloe vera</i>	25	560	
Mercury	$\alpha$ -HgS	<i>Citrus medica</i>	8-16	662	
Mercury	$\beta$ -HgS	<i>Citrus medica</i>	20-40	921, 862	
Gold	Au	<i>Amomum subulatum</i>	20-40	640-1560	
Ytterbium	Yb <sub>2</sub> O <sub>3</sub>	<i>Aloe vera</i>	20-40	986	
Gadolinium	Gd <sub>2</sub> O <sub>3</sub>	<i>Piper betel</i>	20-40	353, 395, 293	
Europium	Eu <sub>2</sub> O <sub>3</sub>	<i>Hibiscus sabdariffa</i>	20-40	614	
Samarium	Sm <sub>2</sub> O <sub>3</sub>	<i>Couroupita guianensis</i>	20-40	563, 652, 710	
Neodymium	Nd <sub>2</sub> O <sub>3</sub>	<i>Citrus x paradisi</i>	20-40	938, 1117, 1352

Cobalt	Co <sub>3</sub> O <sub>4</sub>	<i>Aloe vera</i>	20-40	382, 744	
Iron	Fe <sub>3</sub> O <sub>4</sub>	<i>Aloe vera</i>	26	706	
Vanadium	V <sub>2</sub> O <sub>5</sub>	<i>Aloe vera</i>	20-40	535, 690	
Tin	SnO <sub>2</sub>	<i>Aloe vera</i>	20-40	484, 363	

Representing a unique, handmade product, *Akasha Biophotonics* skin gel and bhasma capsules integrate ancient Siddha wisdom by applying several low-level  $\beta$ - and  $\alpha$ -emitters (europium, neodymium, samarium, gadolinium, lutetium, rhenium, vanadium and potassium), providing low-level activation. The high-level activation of *Akasha Biophotonics* products is achieved through ingestion of radium sulfide (RaS) nanopowder, known to Siddha practitioners as Brammam bhasma. These advanced alchemical arts of the Atlantean civilization have been fully restored for our present-day use, by inspiration from the Higher Self.

An initial production of 20 sets of *Akasha Biophotonics* products (60 capsules and 23 fl. oz. skin gel) are now available for online purchase for a small number of interested readers to participate in this unique quantum application of Siddha and Ayurveda rejuvenation principles. A medical waiver form is required for each purchaser of *Akasha Biophotonics* products, offering life-extension by holistic nuclear medicine.

### Akasha Biophotonics - Purchase Order Form

Order Date: \_\_\_\_\_

Quantity (23 oz. gel, 60 caps): \_\_\_\_\_

Purchaser: \_\_\_\_\_

Subtotal (x \$500 each per set): \_\_\_\_\_

Address: \_\_\_\_\_

Shipping, taxes (+ \$20): \_\_\_\_\_

Total (+ \$10 for international): \_\_\_\_\_

Payment Method: ☐ Moneygram

☐ Western Union

Receiver: Alexander R. Putney  
213 W. Dayton Ave.  
Dayton, WA  
USA 99328

### Akasha Biophotonics - Medical Waiver Form

As a buyer of products from [www.Human-Resonance.org](http://www.Human-Resonance.org), I \_\_\_\_\_ (name) choose to participate in a new, experimental therapy based on numerous recent scientific discoveries concerning the diverse range of beneficial biological activities that are attributed to nanoparticles of transition metal dichalcogenides (TMDs) and related rare-earth compounds.

I have read Alexander Putney's articles regarding the benefits of regular dermal applications and ingestion of a multi-herbal, multi-mineral Ayurvedic bhasma formulation based on ancient knowledge, produced according to standardized methods still used widely in India today.

Recognizing the widespread suppression of natural health products of this kind, I choose to make my own determination regarding their potential benefits. By conducting my own trial, I seek to replicate the beneficial results obtained by many users of these new supplements.

By participating in this new biophotonic therapy I am responsible for following the specific instructions provided with the products, including supplemental hydration on a daily basis with pure water as directed. I understand that trial results are optimized by maintaining a dietary balance promoting gut hydration, as well as exercise, bioelectrification and intermittent fasting.
