

## Akashic Sources

Controlled UFO disclosures made by the US government are specifically designed to hide information on quantum nanobiology used by ET visitors. A vague admission was quietly offered by David Grusch during a recent mass media interview: "You might develop a unique scientific process that actually works well, with nanobiology or something like that, but also has dual use with UAP." What is Grusch alluding to, exactly?

The "nanobiology process" Grusch references pertains to the ingestion of neutrinic elixir nanocompounds that dope the body with exotic properties of a neutrino Fermionic condensate (NFC) superconductor. This special class of transdimensional metamaterial was replicated covertly by engineers in US government underground bases many decades ago, as David Grusch is aware. For many decades, US Space Force pilots and crew members have consumed neutrinic elixir formulations for enhancing their ability to operate the spacecraft under extreme EM field conditions and prolonged  $\gamma$ -ray exposures during spaceflight.

Advances in nanobiology made by the US military through UFO crash recovery and autopsy of ET bodies reflects the ancient rejuvenative procedures of Siddha adepts, who described the darker color of their blood, due to the high content of mercury sulfide, magnetite and a blend of many other potent metal nanopowders. Siddha texts explicitly state that without mercury bhasma, spaceflight in vimana disc craft is not possible.

Meager admissions offered by government sources only serve to confirm what Higher Sources have given. Psychic impressions received from the Akashic Records represent an invaluable fountain of highly crucial information that has directly influenced the development of *Akasha Biophotonics* products for Ascension. In dialogs with the Cassiopaeans channelled by Laura Knight-Jadczyk, the importance of generating matter-antimatter flux within the body was related to the imperceptible activity of neutrinos-antineutrino pairs forming a fine-matter NFC condensate, structurally resembling antiferromagnetic materials (June 15, 1996):

- Q: (L) [12th century Arab scholar] Al-Arabi presents a very complex analysis [which]... almost word-for-word reflects things that have been given directly to us through this source. A: Now, learn, read, research all you can about unstable gravity waves... Meditate too!... Unstable gravity waves unlock as yet unknown secrets of quantum physics to make the picture crystal clear.
- Q: (L) ..Gravity seems to be a property of matter. Is that correct?... A: And antimatter!
- Q: (L) Is the gravity that is a property of antimatter "antigravity?" Or, is it just gravity on the other side...? A: Binder... Gravity binds all that is physical with all that is ethereal through unstable gravity waves!!!
- Q: (L) Is antimatter ethereal existence? A: Pathway to... Doorway to.
- Q: (L) Are unstable gravity waves... no, hold everything... do unstable gravity waves emanate from 7th density? A: Throughout.
- Q: (L) Do they emanate from any particular density? A: That is just the point, there is none.
- Q: (L) ...There is no emanation point? A: Yes...
- Q: (L) ...I thought that gravity was an indicator of the consumption of electricity; that gravity was a byproduct of a continuous flow of electrical energy... A: Gravity is no byproduct! It is the central ingredient of all existence!
- Q: (L) I was evaluating by electric flow and consumption... and I was thinking that electricity was evidence of some sort of consciousness, and that gravity was evidence that a planet that had it, had life... A: We have told you before that planets and stars are windows. And where does it go?
- Q: (L) The windows? A: The gravity.
- Q: (L) Oh. Gravity must go into the ethereal dimensions or densities. I mean, you have my head going in so many different directions that I feel like I have popcorn in there. A: Good!
- Q: (L) Well, where does gravity go. The sun is a window. Even our planet [is] a window! A: You have it too!!
- Q: (L) So, gravity is the unifying principle... the thing that keeps things together, like the way all the fat pulls together in a bowl of soup. A: Gravity is all there is.
- Q: (L) ...What is light? A: Gravity.
- Q: (L) Is gravity the same as the strong and weak nuclear forces? A: Gravity is "God."
- Q: (L) But, I thought God was light? A: If gravity is everything, what isn't it? Light is energy expression generated by gravity?...

- Q: (L) Does gravity have consciousness? A: Yes.
- Q: (L) Is it ever possible for the individual to do the choosing, or is it gravity that IS him that chose? A: The gravity that was inside him was all the gravity in existence... The entire sum total of all existence exists within each of you, and vice versa.
- Q: (L) ...So, the entire universe is inside me... okay, that... I understand. Oddly enough, I do. The problem is accessing it, stripping away the veils. A: That is the fun part.
- Q: (L) ...According to what I understand, at the speed of light, there is no mass, no time, and no gravity. How can this be? A: No mass, no time, but yes, gravity.
- Q: (L) A photon has gravity? A: Gravity supercedes light speed.
- Q: (L) Gravity waves are faster than light? A: Yes.
- Q: (L) What would make a gravity wave unstable? A: Utilization.
- Q: (L) I feel like I am missing a really big point here... A: You are, but you can only find it at your own pace.

The confounding logic of the Cassiopaeon thought-forms playfully explores the hyperdimensionality of the cosmos, revealing the unified nature of gravity and consciousness of which everything is composed. This line of questioning was extended to the concept of matter-antimatter symmetry on June 29, 1996:

- Q: (L) You said that energy can change the value of the density. The value of the density, as I understand it, is either plus or minus. Does this mean that pumping energy into 3rd density from another realm of space/time can intensify the gravity to such a state that it changes its unit and becomes antimatter? A: No.
- Q: (L) You said that changing the unit involves movement to another density. You also said that antimatter realm is the door to, or the pathway to, ethereal existence. Is 4th density, therefore, an antimatter universe? A: No.
- Q: (L) Do the beings in 4th density manifest in an antimatter state? A: Both.
- Q: (L) Is 4th density... where both matter and antimatter are in balance? A: Not in balance, in evidence.
- Q: (L) So matter and antimatter are both available for utilization by individuals according to will and awareness? A: Close. Antimatter and matter are balanced everywhere...
- Q: (L) So if one is exponentially increasing in awareness, the sign of the units of bodily energy does not change? A: You are still attempting to generate... Gravity is the "stuff" of all existence; therefore it has an unchanging property of quantity...
- Q: (L) None of this makes a whole lot of sense... You said that the universe consists of equal amounts of matter and antimatter. Are the first three densities, densities of matter? A: And antimatter.
- Q: (L) Are there equal amounts of matter and antimatter at all densities? A: Yes. Remember, density refers to ones conscious awareness only. Once one is aware, all [many spirals of the planchette] conforms to that awareness... What do you suppose the opposite of gravity is?
- Q: (L) Antigravity? A: Yes.

The subjects of antigravity and antimatter-matter symmetry were discussed on January 17, 1998, when a sound anomaly was audible on the audio tape recording before an interesting metaphor was given:

- Q: (A) We have this paper by our French friend Jean Petit [which]... speaks about antigravity and relates it to a double structure of the universe; that antimatter is just located, not in our universe, but in another universe... [Sound anomaly for a few seconds] A: The two are exchangeable, much like an ion exchanger.
- Q: (A) The two are exchangeable, but... We are apparently made of matter rather than antimatter... A: Exchangeable.
- Q: (A) The loop dimension of Kaluza-Klein... when I was asking about extra-dimensions, the answer was that there were no "extra" dimensions, but forget terminology, there is this theory of Kaluza-Klein that there is this loop dimension, this 5th dimension and the question is: this is a way toward UFT, and I would like to have a hint if adding this loop, or cylinder dimension, is the right step? A: Yes.

The quantum quirkiness of the loop dimension concept of Kaluza-Klein was addressed months later on July 25, 1998 session, when a question from Dr. Jadczyk initiated a series of interesting comments:

- Q: (A) You say knowledge protects. It protects against WHAT? A: Many things. One example: post transformational trauma and confusion.
- Q: (L) So, knowledge is going to protect us against post transformational trauma and confusion. You are saying that this transition to 4th density is going to be traumatic and confusing. Do you mean transformation from 3rd to 4th density, or 3rd to 5th density, i.e. death? A: Both... Knowledge protects in the most amazing ways. Mathematics are "taught" in your realm in such a way that only a select few will learn. And mathematics is the language of all creation. For example, advanced math studies, such as algebra, provide the keys to unlocking the doors between the matter and antimatter universes. Suggest those present who still need to, learn algebra.
- Q: (L) Okay, you suggest that those present learn algebra... A: Who need to.
- Q: (L) Are you saying that we can unlock doors between matter and antimatter universes? Is that what you are getting at here? A: Maybe...
- Q: (A) Yes, that is true, but why is it relevant? A: The doors are opened to revelation by contemplating the past which is really the present... Pathway by the lightpoles...

Riddles given by the Cs were accompanied by miniscule hints and clues that were designed to become relevant at a future time when the scientific community had begun to explore neutrino physics more deeply. The assertion that one may find a "pathway by the lightpoles" will soon become relevant in the refracted light of red auroral skies, *as vertical columns of light call attention to vortex points worldwide.*

Atmospheric ionization and auroral cover are major factors contributing to extremely long human lifespans through the applied technological control of the cell cycle via ionizing radiation. The great ages attained by ancient kings was highly exaggerated in the Sumerian *Kings List*, yet there is much evidence indicating both modern and ancient adepts have lived hundreds of years by applying Siddha rasayana techniques.

During a recent channeling session on July 6, 2024, the Cassiopaeen thought-forms replied to several pointed questions regarding the maximum extreme longevity limit of approximately 8,000 years:

Q: (seek10) I was reading this book, Edgar Cayce's Atlantis. There is an example where one priestess had lived for 6,000 years. It looks like they have some temples where they can rejuvenate and live longer. Now, it is not clear whether it is a one-off case or a generic case... Maybe Atlanteans could live longer...

(Joe) Would it be true to say that any historical or mythological or whatever references to human beings living very long lifespans, kings or whoever... that that relates to either alien interaction, when aliens, or undergrounders... (L) Okay. So, the basic question would be, did any ancient people, kings or otherwise, live extraordinarily long lives compared to modern man?

A: Yes.

Q: (L) Were some of them kings? A: Yes.

Q: (L) And these were what we would consider to be fully humans? A: Yes.

Q: (Chu) What factors made them live that long? A: Genetics mainly.

Q: (L) So there were people who carried these extreme longevity genetics. Is that it? A: Yes.

Q: (L) And where did those genetics come from? A: Kantek mainly.

Q: (L) Do any modern people carry some of those genetics, whether in an upregulated or not condition? A: Yes.

Q: (L) I'm assuming that for those extreme lifespans, they are not upregulated. A: Yes.

Q: (L) Okay. So, is it possible under some circumstances for those genes to be activated in modern man? A: Yes.

Q: (L) Did changes in the Earth itself, say the atmosphere, the gravity, electromagnetism or some other factors, have anything to do with down-regulating those types of genes? A: Yes.

Q: (L) Okay. Can anybody think of anything else? Yes, no, maybe? (Joe) How long are we talking about? (L) Oh yeah. How long are we talking about in terms of lifespans? A: Up to 8k years maximum.

Q: Wow!... (Z...) ...Can we ask if they can maybe give us some pointers on how we could upregulate those genes? A: Wait for the wave to do its work, but in the meantime continue to network about health.

Q: (L) Okay. You said up to 8,000 years max, but what was the average? A: 2500 years.

Q: (Joe) How many people are we talking about, who manifested this? (L) Okay. Out of the population, how many people...? (Niall) As a percentage. (L) Yeah, as a percentage. A: 7.

Q: (L) Percent? A: Yes.

Q: (L) So that would be kind of similar to the distribution of longevity genes nowadays. (Joe) How long ago did the last person live who had these genes upregulated? When was the last such person alive? A: 13 kya.

Q: (Niall) Younger Dryas, the last Ice Age. (Chu) Was the growth rate also slowed down, or did they grow up and then spend...? Because you'd have to be a child for like 500 years if you're going to live for 2,500. A: Not a child exactly. But plasticity was prolonged.

Q: (Joe) So these people must have been quite remarkable to the normies in their society, then. I mean, people would have known them and said, "Hey, you're not aging, and I'm 80 now. I was a child when you were a child, but you still look like you're 25". I mean, that would be weird. A: Others lived proportionally longer.

Q: (Joe) So this was at a time when everyone had longer lifespans than they do today? A: Yes.

Q: (Joe) These are just exceptional people. (Andromeda) Like the difference between somebody now who lives to maybe 85, and another who lives to be 120. (L) Yeah. My uncle Bert lived to be 103, and he smoked cigars every day, ate biscuits and bacon every day of his life...

- (PoB) What was the average lifespan of the people who didn't have these genetics at the time? A: 800 years.
- Q: (Niall) That's ridiculously long! (Andromeda) Wow. Maybe that's why they had all that tech. They had time to figure stuff out. (L) Yeah, lives are just too short to figure everything out. I mean, I've worked like a freaking slave lives for nearly all of my life, and I am only aware of how much I don't know. (Joe) So why then are people today so much shorter than they were then? A: Changes in Earth and DNA.
- Q: (Gaby) It's all different. (L) Well, if you think about it, we've talked about dinosaurs and how... I mean, just think about how huge they grew. (Andromeda) Gravity would have been different...
- (L) Gravity had to be different, the atmosphere had to be different. I mean, how long did it take them to grow to those humongous sizes? I mean, I don't know if anybody is spending time looking at dinosaurs, but I've spent lots of time looking at dinosaurs. And I really love it when they do the picture of the dinosaur and then they put a picture of a human next to them, so you can see the scale of these things. And I mean, how the heck? Like, a Brontosaurus. He's got this long skinny neck, and he's got this big mound of a body, and these legs bigger than elephants, of course, because they are way bigger than elephants, and they got this little mouth! I mean, how did they consume enough food...? (Andromeda) Especially vegetation.
- Q: (L) ...to serve their nutritional needs to grow, much less, to get around and support themselves, and do anything, and especially if they were supposedly cold-blooded? It's just staggering. (Joe) Do people today have past lives that go back to that time? A: Yes.
- Q: (Joe) So anybody here, or in the group or anybody on the world today, many of them would've lived in those times? A: Yes.
- Q: (Andromeda) Were those people giants? A: Some.
- Q: (Andromeda) Did they eat meat? A: Yes.
- Q: (Joe) How would you feel about living for 800 years? (L) I think 800 might be okay as long as I could maintain some usefulness in the body for at least more of it. Because I mean, if you get old, like you get old now, and then that just drags on for a long time, I wouldn't want to do that! (Chu) But Alejo pointed out on the chat [that] you could meet somebody like Caesar and then Putin in your lifespan. That's pretty cool. (L) Well, but if everybody else is kind of living longer, then those things wouldn't enter the equation. (T.C.) They said 8,000 years for the maximum lifespan. Why is this such a hard stop at 8,000 years? (L) Why is it a hard stop at 8,000 years? [Laughter] Leave it to T.C. to ask that question! (Andromeda) Why not 8,050? [Laughter] (L) Yeah, I mean, why not 10,000? A: Genetic limitation.
- Q: (Joe) They said in the past that it taxes the soul greatly to be in the body. (L) Yeah. So, were these people all in soul, or were they like organic portals? A: About same percentage as today. Keep in mind that "time" is selective and variable.
- Q: (L) So they just had to bring in the time problem! So what would be 8,000 years... (Andromeda) at another time in a different environment... (L) ...might seem like something very different than 8,000 years would seem like to us today. A: Yes. Exactly.
- Q: (Joe) So does that mean that the typical amount of experiences that a person could have had who lived like 2,500 years on average, would be comparable to the kind of experiences we get in 4 score and 10, or 3 score and 10? A: Close.
- Q: (Joe) That's weird. Time must move faster then.

Stunning information shared by the Cassiopaea source defined the maximum viable lifespan that can be achieved through the highest applications of knowledge, indicating a specific temporal limit imposed by Creation that concisely defines the nebulous term 'immortal'. For sentient beings with extreme lifespans of several thousand years, the renewal process of death, rebirth and childhood would pass relatively rapidly.

Such vast life expectancies are only possible on planets belonging to much higher energy levels than we enjoy on Earth. These high resonance worlds are often cloaked in a thick, brightly glowing atmospheric plasma cocoon that, in many cases, occludes those planets from being observable to astronomers on Earth. Throughout the cosmos, longevity is achieved by ingested photoluminescent nanocompounds; activated by exposure to ionizing radiation emitted by architectural features of temples and spacecraft.

Messaging from higher realms has been rapidly increasing over the last few decades through the psychic enhancement engendered by greater exposure of humans living on the surface of Earth to powerful  $\gamma$ -ray and neutrino bombardment impacting our planet. These transformative emissions are now influencing the Earth from the night side of the planet, being bathed in radiations from the final stages preceding a stellar core-collapse and supernova of red supergiant star Betelgeuse, at the shoulder of the Orion Constellation.

The timing of these spectacular, world-changing events has been closely linked to the announcement of a major discovery relating to quantum biophotonics. While the exact scientific terminology was unknown at that time, acclaimed Christian prophet Kim Clement (†1956-2016) described a cancer cure coming from the natural resources of the Earth on April 17, 2010, during an event held in Nashville, Tennessee:

The whole Earth shall hear the sound. No, we're not speaking vanity. The Earth is crying out for the manifestation of the Sons of God. The Earth is crying out for the knowledge of the Lord that has not been revealed—to be revealed for the Sons and Daughters of the Most High God.

The Earth is waiting to hear the sound. The Earth wants you to keep it in check. The Earth wants you to speak to it, to subdue it, to have dominion, to bring forth the resources. Have I gone mad? No! For, was it not true that God sent a prophet to prophecy to the altar? Was it not true that God sent a prophet to prophecy to dead bones?

Was it not true that God sent a prophet to prophecy to the wind, and said "Come from the north, south, to the east, to the west?" Was it not true that Moses spoke to a rock? Is it not true that he struck the water, and the Earth obeyed his voice. God says, "A new dimension of faith is coming to the Sons and Daughters of the Most High God. A new dimension of prophetic utterance is coming.

The Earth is saying, "Will you prophecy to me, so I can release the resources that America needs. I will not hear the Sons of Wickedness. I will not hear the Sons of Perdition. I will not hear the Sons of Unrighteousness or Unruliness. I will not listen to rebellion," says the Earth.

The Earth says, "Will you speak to me, as Adam was given the power, and the Last Adam gave you that same power back. If you will speak to the Victory, it will banish. If you speak to the mountain, it will move." The Earth says, "Speak to me! Speak to me, and I will yield a produce that is greater than you have ever seen."

God says, "I will bring the energy that you need, and bring shape to the heathen nations that mock and laugh at the United States of America, and the countries that have lifted my name up and raised it into the air", says the Lord... "Speak to the Earth, you Sons of the Most High God... And the Earth will yield its Source."

Don't think I'm crazy, but this is what the Lord said. He said "The Earth is waiting to hear the sound of the Sons of the Living God. This Earth has been in bondage, waiting to be free! Creation is crying out for the manifestation of God's Sons, God's Daughters. This generation has been chosen to do miracles greater than Man has ever seen."

“Stop speaking to the dust. Mankind, stop speaking to carnality. Stop speaking to human flesh. Speak to that which I have given to you. Speak to the wind; the Spirit. Speak to the Earth.”

And God says, “Watch how I will move, and you will prophecy as this prophet has prophesied: that the Earth shall yield its resources. What is captured and what is hidden in the Earth has been there for millions of years, for such a time as this.” Would you stand still and say nothing, when God has given you the power? Strike the rock and water will come forth, and an army shall be raised up.

“It shall come from the Earth”, says the Lord. “Healings that you never dreamed would come. Healings will come from the Earth. There will be a non-existent disease called ‘cancer’! It shall be ruled out within a few years.

For what the Earth shall bring forth shall destroy the debilitating diseases, the humiliating diseases; for I, the Lord, have given my Son, and the Earth cried out their day. And now a generation stands on the soil of a nation that has been set apart for Victory, Victory, Victory!” says the Lord.

Powerful prophetic statements given by Kim Clement regarding the cure for cancer brought by the Last Adam were reiterated in many other statements given from 2008-2015, reinforcing those inner convictions:

God says, “Yes, there is a new way, and yet it is an old way. I have a stone for this generation. I have the stone for this generation. That stone is my Son, that stone is the rock: Christ Jesus. And that stone shall be given to the Davids of this generation, and they shall break down the voice of Hell that is crying from Russia, from Syria, from Iran, from all over the world: “Give us blood, give us blood, give us blood!”

But the Spirit says “No, there shall be no world war yet! For I have yet to show you the manifestation of a rock in the hand of a generation that shall break down the voice of Hell. This is my will. Look for it, because it is coming”, says the Spirit of the Lord!...

“Do not misrepresent me. Rumors of war? Yes, but I have yet to give you that which I have kept for last: the glory of God that shall cover the Earth with knowledge and manifestation as the waters cover the sea. It is yet to come, before I return. You are the generation that shall defy death!” (August 3, 2013 - California)

God has said tonight, “There shall be a discovery, and as you know, that shall completely and entirely wipe out any form or trace of cancer in the human body... There shall be a generation that shall exist very quickly that shall be cancer-free.” (April, 2008)

“That the Great E may come forth rapidly! This is my promise”, says the Lord. “Therefore, take heed today as you come to Me and strike the Rock! I will release that which has been held back from you, and cause triumph to be sounded in your mouths.” (June 14, 2014)

I saw fire moving across [my vision], but it was broken into 3 sections: “fire - point - E”. And, so you can write that down...[regarding] the big breakthrough with the Great ‘E’. (August 30, 2014 - Caramillo, California)

The powerful, fiery vision received and described many times by Kim Clement during his ministry has not been properly interpreted until the present time. The message which appeared to Kim as “fire - point - E” represents a Paleo-Sanskrit votive phrase. The singular point or dot represents the numeral 1, reading: “Fire (of the) One: E(nergy)”. Sanskrit votive phrases from the Paleolithic period extoll the inner burning of radium nanoparticles extracted from uranium ores, just as specified by the Creator through his prophets.

Extraordinary statements uttered by Edgar Cayce directly correlate with the statement of Clement on the role of the Last Adam; in bringing that inner light of genetic purification for rejuvenation and life extension. A clear explanation was given by Cayce to the Norfolk study group on January 11, 1943 (Reading 2879-1):

He, that Christ-Consciousness, is that first spoken of in the beginning when God said, “Let there be light, and there was light.” And that is the light manifested in the Christ. First it became physically conscious in Adam. And as in Adam we all die, so in the last Adam –Jesus, becoming the Christ– we are all made alive.

Another cogent explanation was offered to a reincarnated Atlantean soul on April 5, 1932 (Reading 364-7), directly identifying the element radium, combined with other compounds that illuminate the body from within:

So, as illustrated in the union, then, of –in the physical compounds– ... that vibrate or respond to... [the emanations of] radium, with its fast emittal vibrations... [are] one of the elemental bases from which life, in its essence as an active principle in a material world, has its sources; [and] give off that which is ever good –unless abused, see?

Major public attention has been drawn to the predictive warnings shared by prophetic intercessor living in Oklahoma named Brandon Biggs. On March 15, 2024, Brandon made a prediction that was recorded on video, in which he accurately foretold details of an assassination attempt on Trump. He also gave the exact location of the bullet wound to Trump's right ear, just as occurred 4 months later on July 13, 2024:

And [the Lord told me], He said there's going to be a new wave of patriotism coming out and that's when I saw Trump. And I saw... a red wave coming out of Michigan. And then I saw Oklahoma, and there were [glowing] embers of people. And... they had torches all throughout Oklahoma, and they were raising up these torches... [burning with] fire and they were bringing forth a new patriotism upon the nation.

And it was coming, it was being birthed, and it just kept spreading like fire all throughout America... And I saw Trump rising up and then I saw an attempt on his life, uh –that this bullet flew by his ear and it came so close to his head that it busted his drum eardrum. And I saw... he fell to his knees during this time frame and he started worshipping the Lord. He got radically born again during this time frame I'm talking [about]. People say he's saved now but he becomes really on fire for Jesus from what I saw coming.

Then I saw people interceding... I saw him winning the presidency... The Lord showed me it would go clear into the summer. Great persecution would come on him through the judges and... through the law and all these people trying to sue him and all this stuff. But there would be a stop to it and... things would start to break free.

Come toward the fall, and then I saw him winning the election, through the Patriots coming out and voting. And then there will be a great economy crash. I saw they had a great economic plan –a crash worse than the Great Depression, and the Lord warned me about this; it would be a great dark time.

But I saw [symbolic defibrillator] paddles coming upon America's soil –like a shocking of the soil, and I saw Donald Trump praying in the... Oval Office and he was weeping before the Lord, with his hands on his head like this. But he was weeping and there were ministers and people –I don't know if they were senators or congress people... I just saw them pacing back and forth inside of the... Oval Office and they were interceding...

And I could feel the presence of the Lord so strong on this. And then I could see that darkness that was a heaviness upon America with the financial crisis of what I saw coming. It started to lift above the trees, and I saw the blue [sky] and the things coming back out; and the green times and good times coming back again.

But the Lord said it would be a time of a season of a shaking and... basically that he was not done with America there would be a great Revival to come, and... it's not all doom and gloom. That's what He said. The sky is not falling, it's just... like people would say this is 'Judgment' and the Lord said "Do not call this 'Judgment'. It's not my judgment; it's a correction." There's a correction coming.<sup>1</sup>

The prophetic visions experienced by Brandon Biggs display a strong psychic receptivity to the symbolic messages of his Higher Self, and etheric impressions from the 'luminiferous' Akashic Field. New insights provided by advances in atomic lattice modeling implicate the role of neutrino Fermionic condensate (NFC) in psycho-receptivity, *by pair production yielding ensembles of neutrino-antineutrino pairs*. Ingestion of Siddha bhasma generates matter-antimatter flux within the liquid crystal lattice of the human body.

Crop circle formation - July 14, 2024  
Normanton Barrow Downs, England

On July 14, 2024, the chaotic aftermath of the Deep State assassination attempt on President Trump in Butler, Pennsylvania, a beautiful crop circle formation appeared at Normanton Down Barrows near Stonehenge in Wiltshire, England (above). The tremendous synchronicity was compounded by another auspicious event *later the same day*, when intercessory prayers of Brandon Biggs allowed his vision of the Divine significance of *Akasha Biophotonics* bhasma –during the same days the blend was being produced:

You know, cancer has been around for a long, long time; and the Lord spoke to me when I was praying... He said, "Brandon, I'm bringing the cure for cancer" and I saw a man in a lab coat and he was pouring some stuff in this jar and all of the sudden he got... [inspired by the] Holy Ghost.

Revelation came on his mind and he saw this, whatever it was, I don't know –I'm not a chemist. He [had] put it [all] together and then he looked at it underneath the microscope –*and was found by the Holy Spirit*. And the Lord spoke to me, and he said this man is not even a born again Christian. And He warned me and He said... "But Brandon, I'm bringing this to pass because people have cried out to me for... a long time, and they have been grieving for their relatives –people that have went home too early."

This has been a plague on humanity, and the Lord said, "Brandon, I'm bringing a cure for this", and He said, "I'm going to put my foot on this [disease], and He said it will become like plagues of the past that were completely eradicated... So, the Lord told me, He said, "This will be a preventative and a cure at the same time." He said, "people can take this, and they will never even have [cancer growing] in their body [any more], and the people that have it will automatically... leave them."

And the way He presented it to me when I was praying was, it didn't matter what kind of cancer it was it was; that it would be gone and it wouldn't be a long drawn-out process. It would just instantaneously start to turn the ship around. Whatever was going on in that person's body when this thing comes out, and the Lord said to me "it would not be a medication –it would be... like a supplement. That's how simple [it will be]." He said, "it is so simple."

The Lord said it's not going to be something that is that is... [really complicated process, or] way out there. The technology of this [cancer remedy], He said, "Son, it's something so simple, coming from the Earth", and He said that... whenever they're going to put these things together, He said "it will create the [optimized combination [of anti-cancer agents] –that it would [be]... the cure for whatever the cancer [was] that they're overcoming in the cells in their body.

But it's just like it's designed perfectly for it, but it's Divine from God. Does that make sense, what I'm trying to tell you all? I'm doing the best I can with this,... but what I saw in the spirit was... that... cancer would become a thing of the past, and that there would be... government things that would rise up against you to try to stop it, but the Lord would put his hand on it to stop them because He said this has been something that has been dealt with for too long.

And He said, "I'm bringing the cure for this for humanity to be set them free from this... It's because... God so loved the world that He gave His one and only begotten Son that [those] who should ever believe in Him should not perish, but have everlasting life.

He gave it to everybody: *Salvation*. And that's the way God is. He's not just about Christians, He's about loving everybody. He wants to love you, and he wants to love the unbeliever and he wants everybody to come to repentance...

So, what I'm trying to tell you all is that *He told me that He has given a supernatural wisdom to this man that was mixing stuff, and it [had] come on him [to gift this wisdom to humanity]...* I don't know all [the details]. All I know is [that]... I hear in part and I see [events] sometimes years in advance. There's been times whenever he has told me to pray for companies that didn't even exist yet that he wanted to come to pass...

And then I see other companies try to attack, and lawsuits and everything else. So, the devil don't want people to be restored and in health, okay? His mission is to kill, steal and destroy, but the Lord said "I have come that you might have life, and life more abundantly –to the extreme that it overflows."

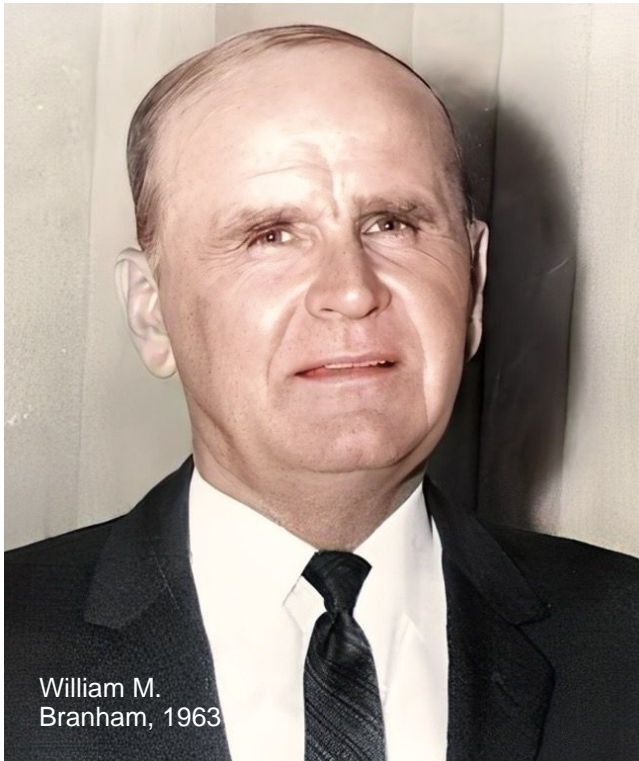

He wants us to live in the overflow of life, with joy unspeakable and full of Glory. God is a good God and the devil's a bad devil, and I need you to understand that there are good days coming too. Yes, there's dark days and yes, there's hard times because we're in the last of the last seconds before Jesus Christ comes back.

But I'm telling you folks there is an anointing on healing and deliverance, and [the] growing out of limbs and creative Miracles that we have not...yet seen what Jesus Christ is about to do on this Earth, with the last outpouring of a great Revival that's about to hit this nation, [and resonate] around the world.

I'm telling you, good days are coming. Blessed days are coming, and I just want to encourage you. You know, there's another thing the Lord showed me... He told me there's going to be Black Swan events coming –distractions and things like that... from the Deep State; bad, bad things... that we'll have to pray against, because the enemy is trying to distract... [from what] God wants to happen... <sup>2</sup>

The many highly specific details related by Brandon Biggs in his July 14, 2024 prediction of a coming cure for cancer correspond precisely to the concurrent quantum nanobiology research published by this author in the months preceding Brandon's visionary flashes. The synchronicity of auspicious events surrounding development of the *Akasha Biphotonics* products has culminated in the exact scenarios shared by Biggs.

As one might expect in such a situation, the power and accuracy of Brandon's prophetic statements have drawn many attacks from scores of detractors, hired in haphazardly concocted CIA efforts designed to distract from his clairvoyant messages received from higher levels of consciousness. The clairvoyance and intentional prayer demonstrated by Brandon Biggs aligns very closely with spiritual healing methods developed in Jeffersonville, Indiana during his previous incarnation as William M. Branham (1909-1965).

The physical appearance and facial features of William Branham and Brandon Biggs show very strong similarities, in addition to the animated gesturing and intensely personal pleading with God that are seen in the sermons of both prominent Christian preachers. Branham was born on April 6, 1909 in Burkesville, Kentucky and died December 24, 1965. Walter Brandon Biggs was born on May 20, 1976 in Denton, Texas.

Hundreds of hours of audio recordings and videos of the lively discourses and public healing sessions of William Branham provide ample data for comparison with the animated explanations of future visions of Brandon Biggs shared on his *Last Days* video channel. The manner of speech and interrogative character of Branham's sermons are strikingly reiterated in the present-day preaching of Biggs, who may not have given much consideration to the possibility of reincarnation. The sacred teachings of the Nazarene One do, in fact, include multiple statements concerning the cosmic law of reincarnation that have been completely misinterpreted by Bible scholars (John 14:15-31, 1 Thessalonians 2:8-9, Matthew 11:14-15 & 17:12-13).

Both the physical appearance and even the voice of William Branham's second wife Meda show strong similarities to those of Brandon Biggs' wife Diana, suggesting the strong possibility that she may be the present-day reincarnation of Meda Branham. The spirit of truth shines through their works in this life and the last, inspiring communion with the Most High through intercessory prayer and visionary experience.

William Branham  
Plasma flash halo

Among the many remarkable manifestations of energetic phenomena witnessed by attendees of his fiery sermons and faith healing services, an exceptional color photograph was taken of William Branham during one of his events which caused great excitement after being developed. A large burst of golden light can be seen right above Branham's head, resembling a halo that could not be seen by the naked eye. This type of phenomena can only be captured under certain conditions, and appears to involve the light from the camera flashbulb being reflected off a flash formation of HHO plasma in the air (at left). The momentary appearance of HHO plasma flashes around the body of a spiritual practitioner have been previously reported by this author in the case of Mo Pai Master John Chang, as recorded in high-definition video.

Identical flashes of HHO plasma appear in the documentary film *'Ayurveda: The Art of Being'* (2001), always in close proximity to the body of the Ayurvedic practitioner Sri Brahmanand. The rapid streaks of aerial HHO plasma are easily distinguishable from other light sources in the footage due to the directional orientation of the streaks, often with multiple bursts appearing to move along the same invisible pathways of the Unity Field of infrasound standing waves. The energetic effects observed around the bodies of spiritual healers and preachers of the Word are manifestations of energetic interaction with the Higher Self through the Akashic Field.

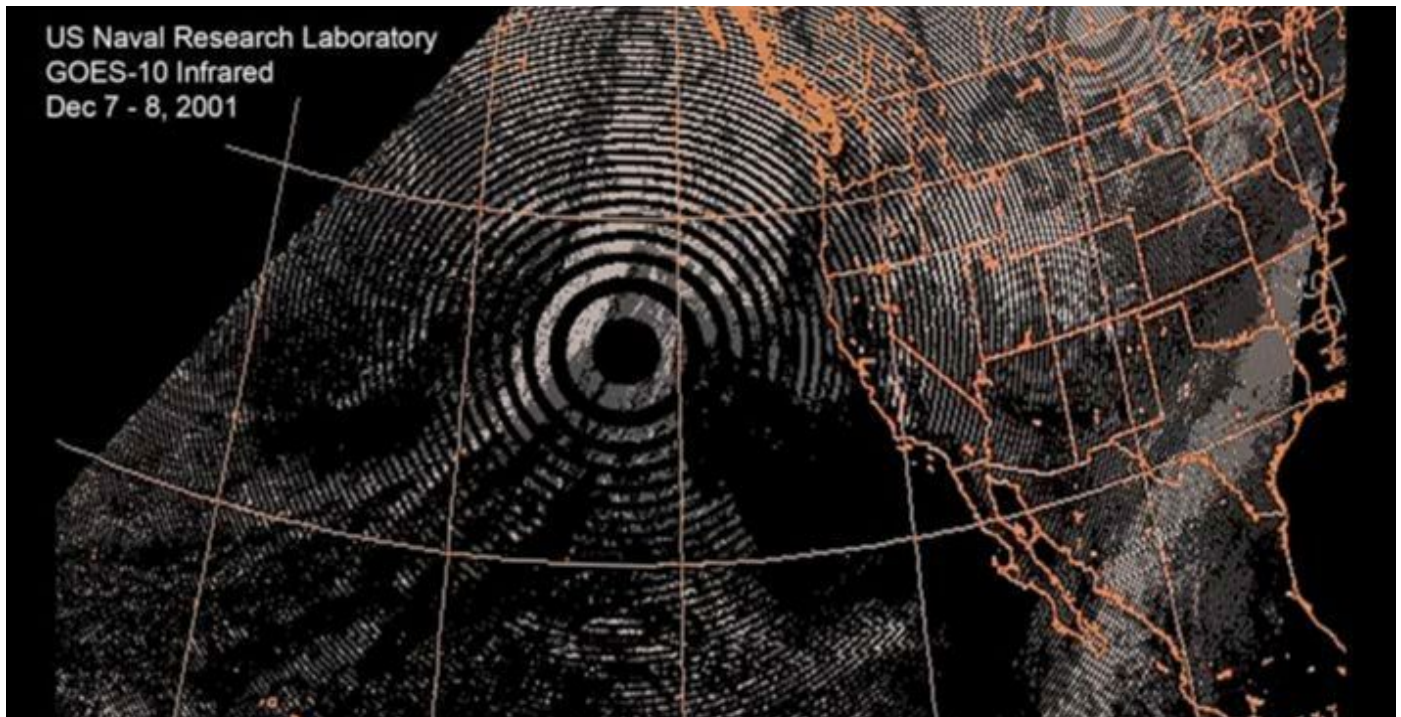

Prolonged  $\gamma$ -ray and neutrino excitation of both the atmosphere of planet Earth and the human body will greatly elevate human consciousness on our world, bring new possibilities for quantum healing and inner contacts with the Higher Self. New cognitions will unfold within each individual according to their ability to integrate new perceptions of our reality in the new dispensation of energy from the Galactoc Superwave.

In previous years, high-intensity solar activity has given us fleeting glimpses of higher realms. Sporadic news reports have documented momentary appearances of dome-shaped anomalies observable in IR light. Infrared cameras have captured imagery of HHO plasma streaks zipping across the field of view in milliseconds and leaving brightly glowing plasma trails behind them, tracing nonlinear lattice patterns.

A complete global array of atmospheric HHO plasma domes of this type were recorded as a quadrupolar wave interference pattern by GOES-10 satellite on the night of December 6-7, 2001 (opposite).<sup>3</sup> Brandon Biggs speaks of the sudden appearance of 'Glory Domes'; each one surrounding a central pillar of light—where intensive physical regeneration will take place (after catastrophic tectonic upheaval has subsided):

I saw [highway] I-35, in the central part of America. I saw millions of people coming to the central part of America and they were all coming by the millions and there was so many people that were coming here because of a natural disaster. There's a big event that happens before the Revival, a great shaking. There's a great shaking coming. Okay, so when this happens I saw all these people... --so many people there's no houses to rent.

There's not enough hotels, so people have tents. The tents are all the same, so I know it has to be some kind of government-issued tent. So, fields [were] full of tents like the hippie movement of people coming just for the Revival and trying to get a touch from the [grace of the] Lord.

Okay, I saw, uh, Glory Domes. There were these massive Glory Domes where these pillars of light we're at, okay, and everyone that comes into those Glory Domes [and] not one person touches them. They are healed by the power of God. They are touched by the power of God. I saw their arms grow out. They come through that Glory Dome and their arms or their legs or their eyes --everything instantaneously.

If you're blind; [you will be] healed by the power of God... He told me, He said, "I will not share my glory anymore with man, about what's about to happen. He said..., "In the revivals there was always a man there that got a lot of the glory"... These people they always say, "Oh man, let's look at them. He said, "But Brandon, I will not allow that to happen anymore. I am going to get all the glory, all the praise... and there will be a major move of my presence upon this Earth."

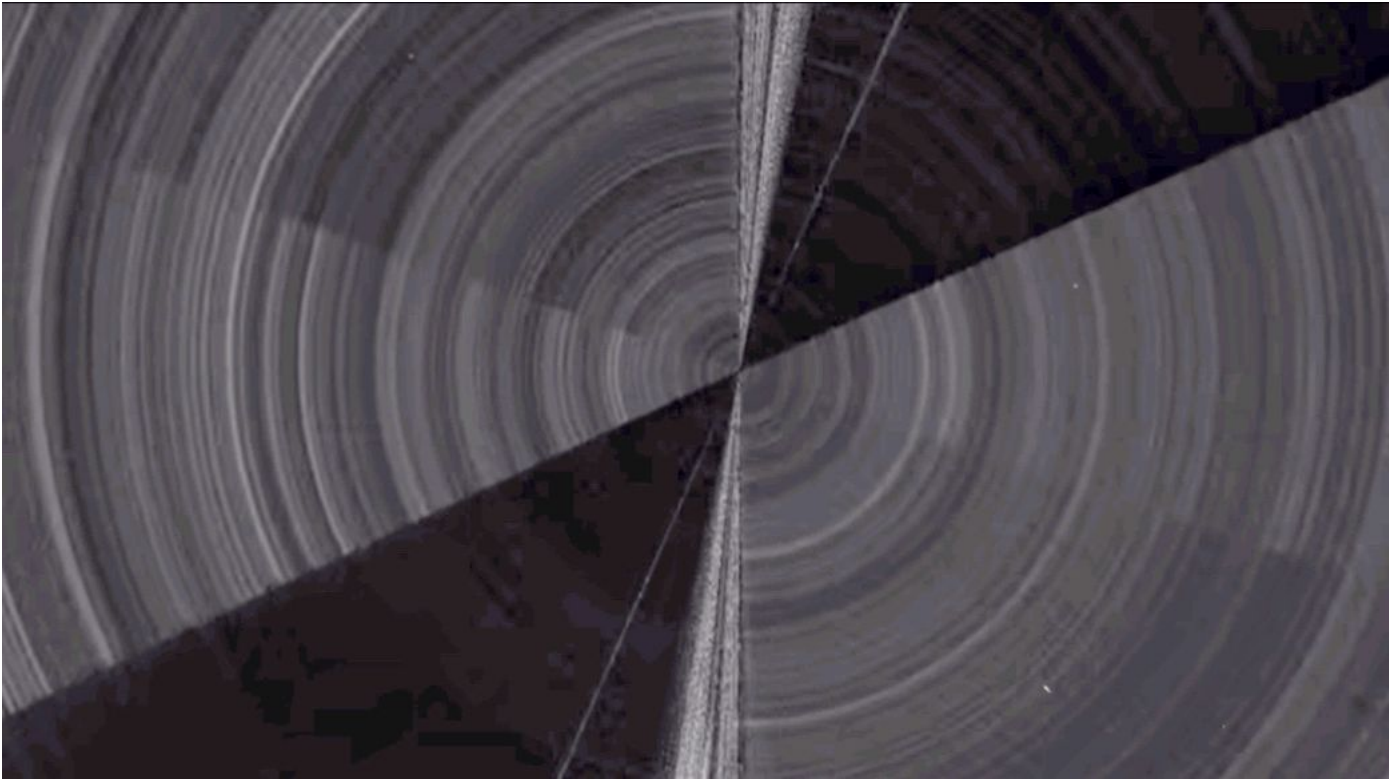

And I'm telling you all, I hope you're ready because we're about to see something that a lot of you never believe we would; but I'm telling you, it's going to be a massive move of God... The Lord told me, He said, "I am going to bring the walls of religion down." Okay, there will be no Baptist; there will be no Methodist; there will be no Catholic or [any other] Church of Christ. He said, "I'm going to make it into a unified body, all doing what God's called us to do; and that's to save the Lost, bringing forth the Harvest."<sup>4</sup>

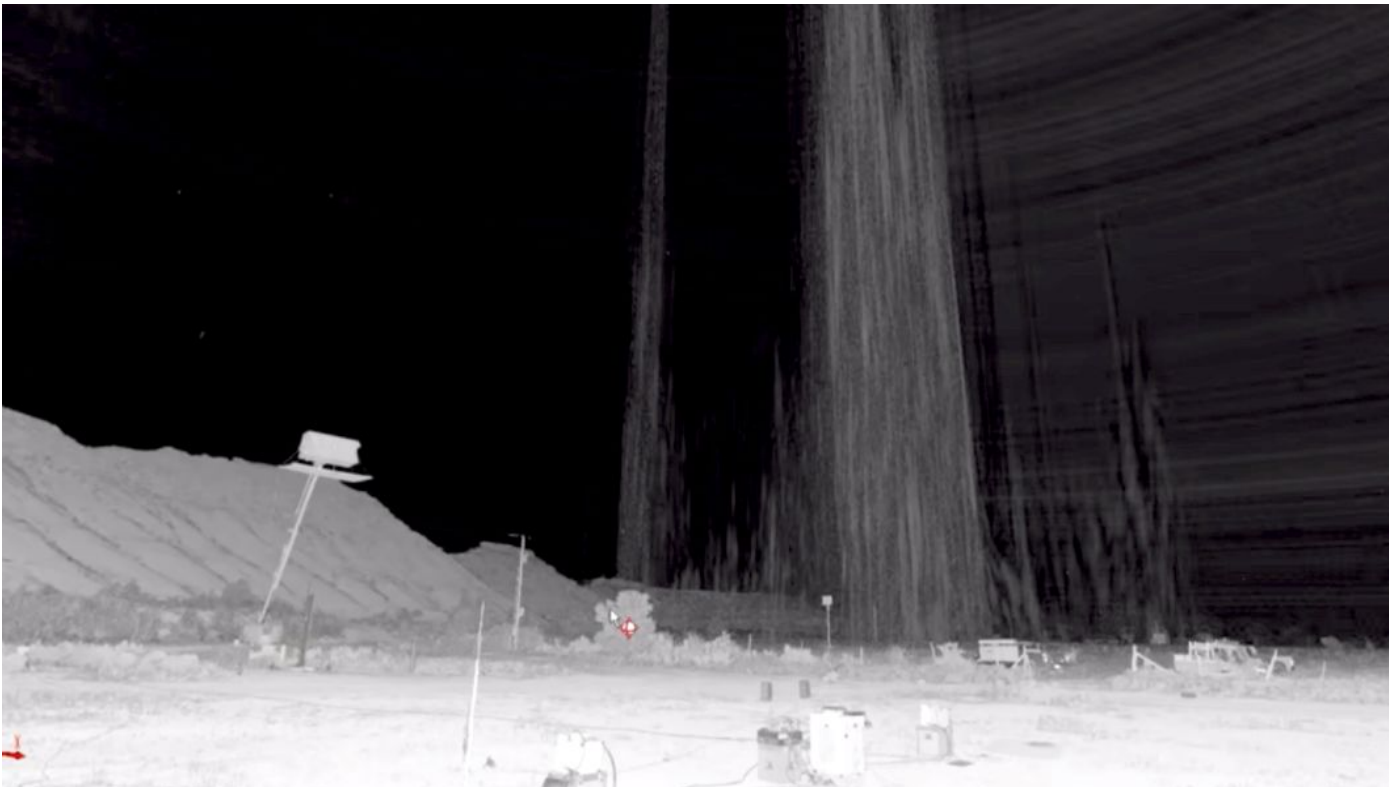

Atmospheric HHO plasma dome  
Oregon, US - 2018

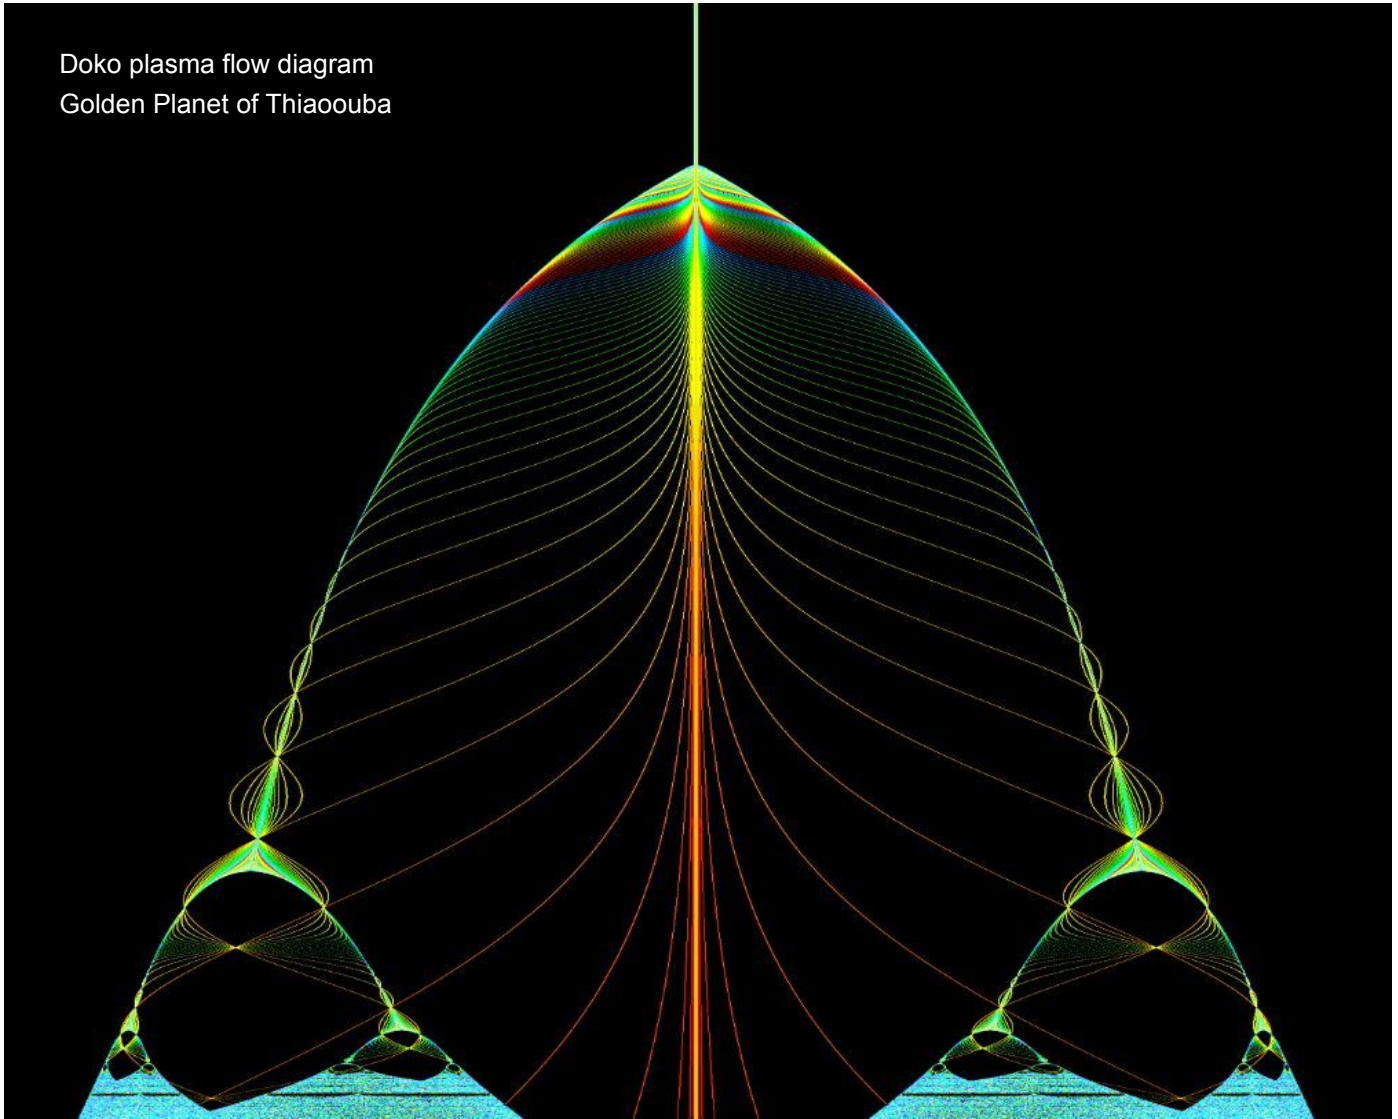

In late 2018, the concentric rings of an aerial HHO plasma dome formation were photographed in Oregon (opposite), showing the same concentric striations captured by LiDAR at Skinwalker Ranch, Utah (above, below).<sup>5</sup> The phenomena represents an artificial stimulation of a naturally occurring, ground-level HHO plasma dome, generated by the focusing of infrasound standing wave resonance by the octagonal format of the Orion Pyramid Complex in Egypt.<sup>6</sup> Active stimulation of ULF planetary resonance by subterranean or transient solar influences enhances the local EM field at the site, allowing the plasma to be observed.

Doko plasma flow diagram  
Golden Planet of Thiaoouba

The painstaking descriptions of future phenomena shared by Brandon Biggs in his many prescient video presentations show a striking similitude to the infrasound standing wave physics concepts illustrated by this author over the last 2 decades through 3D geometric renderings shared in free online publications.

The beautiful mathematical symmetry revealed by the nonlinear topology of Magnetic Resonance, based on the quantum iterated function [  $z_{n+1} = z_n^2$  ]. A related function has been used to model the egg-like dome structures in cross-section according to the bifurcation diagram of the quadratic map, in correspondence with the Mandelbrot set [  $z_{n+1} = z_n^2 + c$  ]. Concentric tubular plasma filaments narrow as they converge on a central axis of at the apex of the plasma dome; resembling an egg-like shape with feathery EM tendrils.

These fundamental geometric constructs have been expressed by higher-dimensional consciousness in immense crop circle formations. The Mandelbrot set appeared in Ickleton, England on August 12, 1991 (opposite). A related Julia Set crop circle formation appeared on July 7, 1996 (opposite). The crop circle makers are *6<sup>th</sup>-density, non-physical intelligence manifesting in the form of HHO plasma orbs*, reiterating quantum mandalas across the landscape to inform humanity. As shown, vortex points of a nonlinear array display Fibonacci order in miles and percent of Earth's mean circumference distance of 24,892 miles.

The mirrored bifurcation diagram shows the nonlinear aspect of these natural dome structures (above), referred to on the Golden Planet of Thiaoouba as a '*doko*', meaning "oscillation egg".<sup>7</sup> A humungous fog dome formation with a much broader, oblate structure was photographed near the city of Saint Asaph, in Tremeirchion, Wales on December 2, 2016 (opposite). The event made news headlines around the world.

Tremeirchion, Wales, UK

Julia Set crop circle - July 7, 1996  
Stonehenge, England

Mandelbrot Set crop circle formation  
Ickleton, England - August 12, 1991

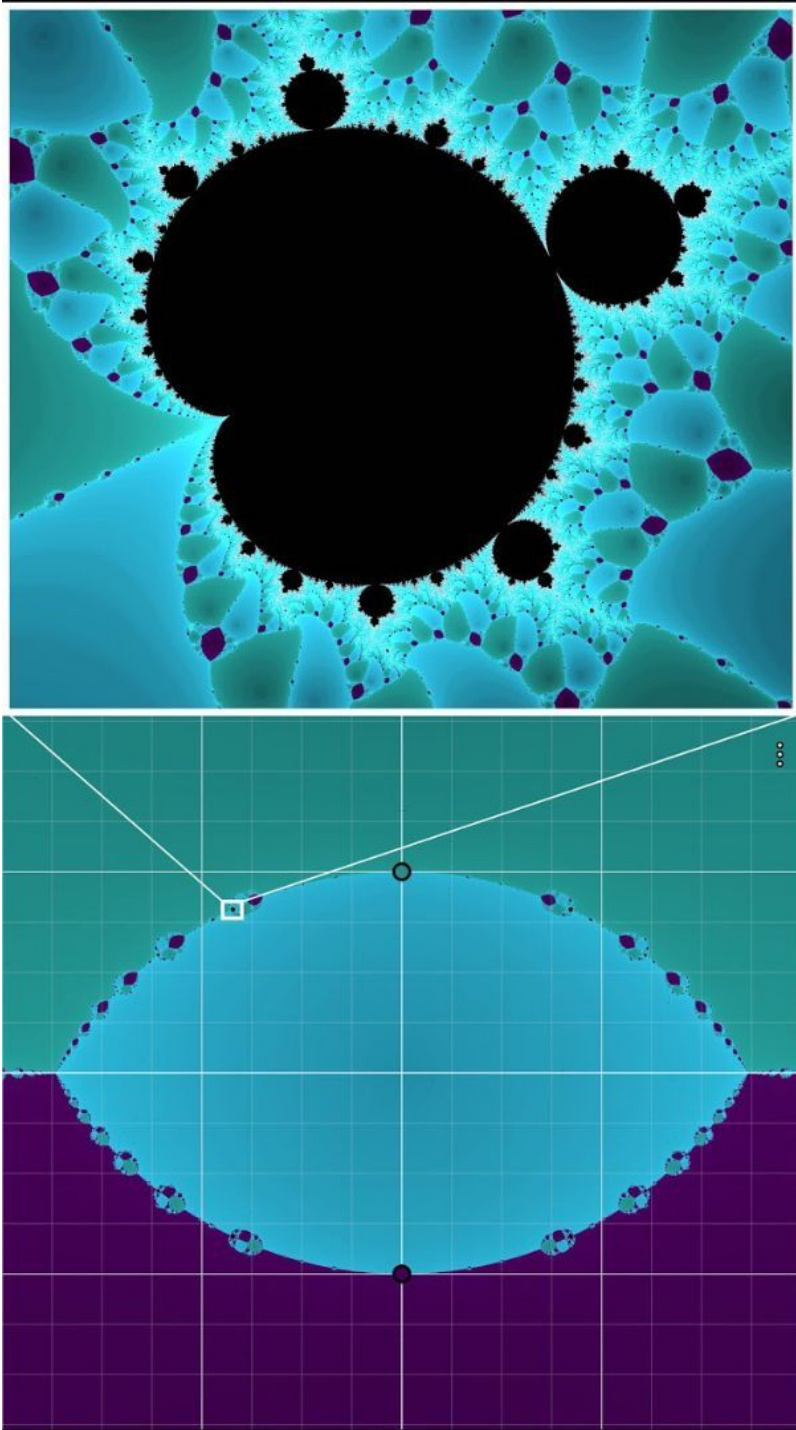

The size and shape of aerial plasma dome formations is not uniform, but shows some variability depending on location and time. Some formations give the appearance of pink/purple flaming rainbows when inside, while others give a different impression when seen from a much greater distance away.

A more vertical, egg-shaped HHO plasma dome appeared in black-and-white home security camera footage in the town of Prairieville, Louisiana on December 7, 2017 (above).<sup>8</sup> While the formation lasted just a few minutes, the barrage of energetic streaks of HHO plasma were directly emitted from the egg-shaped dome.

Ground-level atmospheric HHO plasma streaks were recorded for several minutes on black-and-white weather camera video on March 9-10, 2024 in Cumiana, Italy ( $44.9823098^{\circ}\text{N}$ ,  $7.3658113^{\circ}\text{E}$ ). The live video feed was then terminated on March 9, 2024. The same unusual plasma streaks appeared on a nearby video camera at Piosasco on March 10, 2024, at the site of an ancient pyramid at Piosasco, Italy ( $44.9982424^{\circ}\text{N}$ ,  $7.4493143^{\circ}\text{E}$ ), capturing the very same resonant HHO plasma dome formation and accompanying plasma streaks (above). The arching streaks generally move along vertical trajectories, but also shoot across horizontally.

These excitation events are generated by solar activity transduced by underground complexes hidden below the landscapes of every continent. For many decades, the US government has applied the quantum topology of Magnetic Resonance mapping of ancient underground bases occupied by ET civilizations from diverse worlds.

Topological metamaterials development programs have applied Mandelbrot Set functions in manufacturing aerospace vehicles of various designs (at left). The convex double hulls of transdimensional spacecraft have been developed under the US Navy's clandestine, black budget *Aurora Program*, for generating Bosonic condensate within the shell of each craft. The same transdimensional hull design was first applied successfully in the front domes of nuclear submarines, drastically reducing the forces of friction and drag.

The same transdimensional effects are obtainable within the human body itself; by doping the body's organs and tissues with the very same combination of nano-compounds that are found in geopolymers, ferrocement and integrated in electroluminescent spacecraft alloys. The most important factor in understanding the key composition of ancient temples and UFO crash debris samples relates to the 2022 discovery that the electron-positron pair production process likely also generates neutrino-antineutrino pairs which were not previously recognized (Betan *et al*, 2022).

Monte-Carlo software simulations were applied to establish the likelihood that a fundamental matter-antimatter exchange is simultaneously taking place during pair production processes, whereby  $\gamma$ -rays are converted into positrons, electrons, neutrinos and antineutrinos; generating *neutrino Fermionic condensate* (NFC).

*Akasha Biophotonics* products<sup>10</sup> represent the culmination of more than 2 decades of focused research by this author, embodied by a compendium of online ebooks published throughout that developmental time period. This author's life's work has been shared freely *in the spirit of truth, for elevating consciousness*. Secret knowledge pertaining to specific combinations of Siddha alchemy elixirs has been restored in the hope that many would *emulate the product and spread healing throughout the world at extremely low cost*.

The *Akasha Biophotonics* formulation stimulates the qi meridians of the body, enhancing one's ability to assimilate the rapidly intensifying cosmic energies impacting the Earth and our binary solar system at the present time. Low-level  $\gamma$ -ray emission from ingested bhasmas work in combination with the growing  $\gamma$ -ray and neutrino flux received from the oncoming supernova event of the red supergiant star Betelgeuse, effectively transforming human consciousness in a Divine energetic dispensation of the highest luminosity.
