

99.99% pure Cu wire  
Starting material

Atlantean Reactor product  
Aurichalcum  $\square$ -Ti<sub>3</sub>Au wire

### Atlantean Aurichalcum Reactor Products & Specifications for Sale

Alexander Putney for Human-Resonance.org - July 13, 2019

Alexander Putney's breakthrough invention of the *Atlantean Aurichalcum Reactor* enables resonant atomic transmutation of several pounds of 99.99% pure copper starting material into >95% aurichalcum (technically classified as  $\square$ -Ti<sub>3</sub>Au intermetallic compound) in just a few weeks of operation at low temperatures.

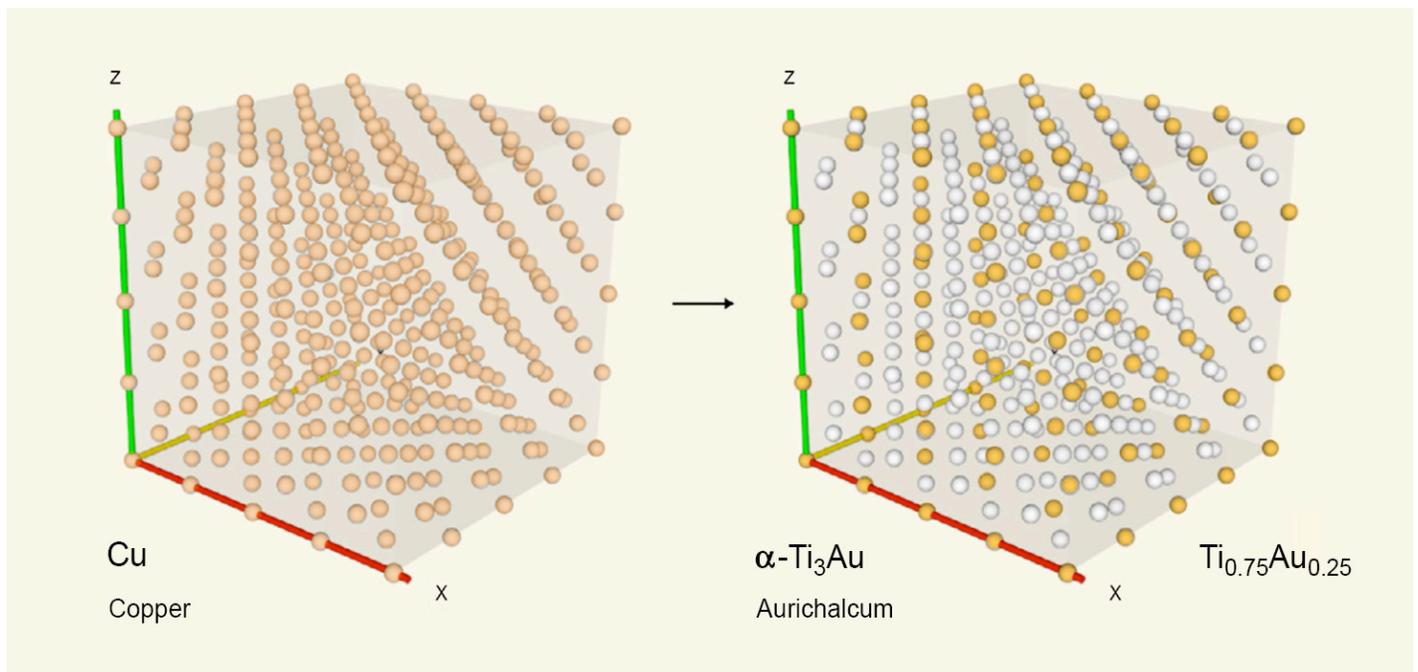

Replicating volcanism, the resonant reactor conversion process applies the same safe, natural conditions of heat and gas pressure to produce  $\square$ -Ti<sub>3</sub>Au, *without producing any toxic byproducts or radioactive isotopes*.

Bulk purchase of  $\square$ -Ti<sub>3</sub>Au aurichalcum is now offered by the lb, directly from Alexander Putney at Human-Resonance.org, making Ti<sub>3</sub>Au commercially available for conducting further scientific testing and analyses.

A final annealing process is further required to compress the  $\square$ -Ti<sub>3</sub>Au reactor product into the high-density  $\square$ -Ti<sub>3</sub>Au lattice structure for all high-end applications requiring high hardness or superconductivity. The annealed  $\square$ -Ti<sub>3</sub>Au form will be made available once all pertinent analyses have been completed.

Upon melting pure  $Ti_3Au$  aurichalcum, the intermixed gold and titanium components readily separate into 57.8% gold and 42.2% titanium by weight, due to the significant atomic mass disparity between the two elements. Standard gold refining methods can be used to separate the 57.8% gold content from the titanium matrix to obtain 99.9% pure gold if desired.

The beautiful simplicity of the Atlantean Aurichalcum Reactor design ensures its ease of use, which operates safely and silently with automated digital controls, at relatively low temperature and pressure settings, drawing low energy from a 220V 10amp electrical source.

Design specifications and operating instructions for the Atlantean Aurichalcum Reactor are also available for purchase at low cost directly from Alexander Putney at [Human-Resonance.org](http://Human-Resonance.org), requiring only a standard Non-Disclosure Agreement (NDA) to ensure the intellectual property rights of the inventor.

- Atlantean Aurichalcum Reactor System - Purchasing & Operating Costs

US\$ 1,111	<u><i>Atlantean Aurichalcum Reactor System Specifications &amp; Operating Instructions</i></u>
~US\$ 1,330	<i>Estimated cost of reactor components (for purchase &amp; assembly by the buyer)</i>
~US\$ 250	<i>Estimated cost of starting materials (for purchase &amp; preparation by the buyer)</i>
~US\$ 9 / mo.	System requirement: 220V 10amp power source (supplied by the buyer)
—————	Intellectual property requirement: standard Non-Disclosure Agreement (NDA)
~US\$ 2,700	Total <i>estimated</i> cost for Atlantean Aurichalcum Reactor purchase and operation

Pricing of new, standard component parts for constructing the Atlantean Aurichalcum Reactor may vary, while used equipment may also effectively serve as reactor components to cut costs significantly.

Each purchaser of the Atlantean Aurichalcum Reactor System is licensed to operate a single reactor unit, with a maximum capacity of 8 lbs / batch, with each batch requiring 3 weeks of processing at resonance. Each 3-week cycle of operation produces up to 8 lbs of aurichalcum wire, presenting >50% Au content.

If any purchaser wishes to increase total production capacity by operating 2 or more reactors, licensing for each additional reactor (of the same capacity) can be obtained at a further cost of \$1,111 / reactor. Special large-scale production licenses can also be purchased from the inventor upon inquiry by email.

- Atlantean Aurichalcum Reactor - Purchasing Instructions

- 1) Download the required standard NDA form ([www.human-resonance.org/nda.pdf](http://www.human-resonance.org/nda.pdf)), then fill out, sign and send by email to Alexander Putney <[humanresonance@gmail.com](mailto:humanresonance@gmail.com)>
- 2) Once notified the sale has been approved, send the US\$ 1,111 payment to Alexander Putney via Western Union. *Online payments are not accepted.* Purchasers located in the United States or Canada may also make payment by check, with an additional 7 days required for check processing.
- 3) Upon receipt of payment, Alexander Putney will send *Atlantean Aurichalcum Reactor Specifications & Operating Instructions* by email to the purchaser as a PDF file. In accordance with the standard Non-Disclosure Agreement, this proprietary document received from the inventor, Alexander Putney, must remain strictly confidential. All inquiries on the subject can be directed to the webpage: [http://www.human-resonance.org/Aurichalcum\\_Products.pdf](http://www.human-resonance.org/Aurichalcum_Products.pdf)
